

Allspring Growth CIT

Asset class: Equity

Class	CUSIP
E	949791628
E2	94988K286

FUND OBJECTIVE

The Fund seeks long-term capital appreciation by principally investing in small-, mid-, and large-capitalization companies where growth is robust, sustainable, and not fully recognized by the market.

FUND STRATEGY

The Collective Fund invests principally in equity securities of companies that are believed to have prospects for robust and sustainable growth of revenues, earnings, and cash flows. The Fund invests in equity securities of companies of all market capitalizations. In addition, the Fund may also invest in equity securities of foreign issuers through ADRs and similar investments. The Advisor invests in growth companies which can be described as having robust and sustainable growth characteristics. These are typically faster growth stocks with secular growth drivers exhibited over an extended period of time. A critical part of the investment process is identifying stocks whose growth is under appreciated by the market, or what is referred to as the "gap" between the current valuation and the company's long term growth rate.

TOP HOLDINGS (%)

Microsoft Corporation	11.00
NVIDIA Corporation	10.47
Amazon.com, Inc.	8.55
Apple Inc.	6.94
Meta Platforms Inc Class A	5.59

Past performance is no guarantee of future results. Current performance may be higher or lower than that quoted. Investment return and principal value will fluctuate so that units, when redeemed, may be worth more or less than their original costs. Index returns are for illustrative purposes only. Performance for other unit classes will differ due to different fee structures and other factors. All values are unaudited and subject to revision. All income is reinvested in the Fund and reflected in the unit value. Fund returns are reported net of the annual fund expenses, primarily including audit, custody, fund accounting and investment advisory expenses, charged to the Fund, but does not include the potential impact of taxes applicable to an investment in the fund. All investing involves risk, including the possible loss of principal.

Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from those of the funds. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison. The performance shown is compared to a broad-based securities market index. Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with investment products.

1. The Russell 3000® Growth Index measures the performance of those Russell 3000 Index companies with higher price/book ratios and higher forecasted growth values. You cannot invest directly in an index.

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The Trustee is a trust company organized under the laws of the Commonwealth of Pennsylvania and wholly owned subsidiary of SEI Investments Company (SEI). The Trust is not a mutual fund, as defined under the investment company act of 1940, as amended.

Definitions and Risks:

Price/Earnings (P/E) is the price of a share of a stock divided by earnings per share, usually calculated using the latest year's earnings.

Price/Book (P/B) is the ratio used to compare a stock's market value with its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio. Half the stocks in the portfolio will have higher market capitalizations; half will have lower.

5-year earnings growth rate of a fund is the weighted median of the annualized rate of earnings-per-share growth over the trailing five-year period for the stocks held within a fund.

Alpha measures the excess return of an investment vehicle, such as a mutual fund, relative to the return of its benchmark, given its level of risk (as measured by beta).

Beta measures fund volatility relative to general market movements. It is a standardized measure of systematic risk in comparison to a specified index. The benchmark beta is 1.00 by definition.

Sharpe ratio measures the potential reward offered by a mutual fund relative to its risk level. The ratio uses a fund's standard deviation and its excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk-adjusted performance.

Standard deviation of return measures the average deviations of a return series from its mean and is often used as a measure of risk.

R-squared is a measurement of how similar a fund's historical performance has been to that of the benchmark. The measure ranges from 0.00, which means that the fund's performance bears no relationship to the performance of the index, to 1.00, which means that the fund's performance was perfectly synchronized with the performance of the benchmark.

Information ratio measures how much the fund outperformed the benchmark per unit of additional risk taken. This value is determined by taking the annualized excess return over a benchmark and dividing it by the standard deviation of excess return.

[‡]Calculated based on a three-year period. Relative measures are compared with the Russell 3000® Growth Index.

Risks:

Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This fund is exposed to foreign investment risk and smaller-company securities risk.

Allspring Global Investments™ is the trade name for the asset management firms of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P. These firms include but are not limited to Allspring Global Investments, LLC, and Allspring Funds Management, LLC. Certain products managed by Allspring entities are distributed by Allspring Funds Distributor, LLC (a broker-dealer and Member FINRA/SIPC).
