

Allspring Special Mid Cap Value CIT

Asset class: Equity

Class	CUSIP
MD	01988T886

FUND OBJECTIVE

The Fund seeks to achieve long-term capital appreciation primarily through investments in mid-capitalization companies.

FUND STRATEGY

The Fund invests principally in equity securities of medium-capitalization companies, which the Manager defines as securities of companies with market capitalizations within the range of the Russell Midcap® Index* at the time of purchase.

*The Russell Midcap Index measures the performance of the mid-cap segment of the U.S. equity universe. It is a subset of the Russell 1000® Index and includes approximately 800 of the smallest securities based on a combination of their market capitalization and current index membership. You cannot invest directly in an index.

Past performance is no guarantee of future results. Current performance may be higher or lower than that quoted. Investment return and principal value will fluctuate so that units, when redeemed, may be worth more or less than their original costs. Index returns are for illustrative purposes only. Performance for other unit classes will differ due to different fee structures and other factors. All values are unaudited and subject to revision. All income is reinvested in the Fund and reflected in the unit value. Fund returns are reported net of the annual fund expenses, primarily including audit, custody, fund accounting and investment advisory expenses, charged to the Fund, but does not include the potential impact of taxes applicable to an investment in the fund. All investing involves risk, including the possible loss of principal.

Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from those of the funds. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison. The performance shown is compared to a broad-based securities market index. Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with investment products.

1. The Russell Midcap® Value Index measures the performance of those Russell Midcap companies with lower price/book ratios and lower forecasted growth values. The stocks are also members of the Russell 1000® Value Index. You cannot invest directly in an index.

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The Trustee is a trust company organized under the laws of the Commonwealth of Pennsylvania and wholly owned subsidiary of SEI Investments Company (SEI). The Trust is not a mutual fund, as defined under the investment company act of 1940, as amended.

Definitions and Risks:

Price/Earnings (P/E) is the price of a share of a stock divided by earnings per share, usually calculated using the latest year's earnings.

Price/Book (P/B) is the ratio used to compare a stock's market value with its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio. Half the stocks in the portfolio will have higher market capitalizations; half will have lower.

5-year earnings growth rate of a fund is the weighted median of the annualized rate of earnings-per-share growth over the trailing five-year period for the stocks held within a fund.

Risks:

Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Smaller-company stocks tend to be more volatile and less liquid than those of larger companies.
