Allspring (Lux) Worldwide Fund - Emerging Markets Equity Income Fund,
 a sub-fund of Allspring (Lux) Worldwide Fund
Class Z (GBP) Shares - acc. (LU085I224872)
 Management Company: Allspring Global Investments Luxembourg S.A.

Objectives and Investment Policy

The fund seeks long-term capital appreciation and current income by investing, under normal market conditions, at least 80% of its total assets in dividend-paying emerging market equity securities across any market capitalisations. Equity exposure is achieved directly through investment in equity securities and/or indirectly through participatory notes, convertible securities, equity linked notes and/or certificates. The fund may also invest in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs and similar depositary receipts as well as equities denominated in U.S. dollars issued by non-U.S. issuers. The fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.

Emerging market equity securities are securities issued by companies that are traded in, have their primary operations in, are domiciled in or derive a majority of their revenue from emerging market countries as defined by the MSCI Emerging Markets Index.

The fund may invest up to an aggregate of 20% of its total assets both directly and indirectly in equity securities of Chinese companies listed on the Shanghai Stock Exchange or Shenzhen Stock Exchange (commonly known as China A shares). Equity securities of Chinese companies are securities issued by companies with their registered offices in the People's Republic of China or exercising a predominant part of their economic activities in the People's Republic of China. The fund may use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. The fund may hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, the fund will not engage in extensive foreign currency hedging.

The fund's investment strategy includes both a top-down strategy, which takes account of overall economic and market trends in each country, and a bottom-up strategy, in which the fund uses fundamental research for security selection. The fund seeks to manage towards a low carbon portfolio and targets an overall carbon intensity that is at least 30% lower than that of the MSCI Emerging Markets Index. The fund focuses on companies where the potential return is determined to be in excess of the fund's estimation of equity value at risk from material ESG factors by investing at least 64% of the fund's assets in companies that it believes are capable of managing both ESG and operational risks through responsible practices on material ESG issues or companies that it believes have the potential for improving their operational and ESG profiles over time.

Through the use of a negative screening process, the fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under allspringglobal.com. Shareholders may also request a copy from the fund or the Management Company.

This share class does not distribute dividends. Income is reinvested in the fund. .

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").

The fund is actively managed but uses the MSCI Emerging Markets Index as a reference for selecting investments and for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the fund's returns over the past 5 years, using returns from a comparable existing share class for the periods in which the share class was not operational. Please note past returns may not be a reliable indicator of the future risk and reward profile of the fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

< Typically Lower Rewards

Higher Risk

Typically Higher Rewards >

| | | | | | | |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|

The class is in category 5 because the average amount returns varied each year over the past 5 years was equal to or above 10.0% and less than 15.0%.

The following additional risks may impact the fund's returns:

Counter-Party Risk - The fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund.

Custodial and Sub-Custodial Risk - Since the fund may invest in markets where custodian and/or settlement systems are not fully developed, the fund's assets may be exposed to risk in circumstances whereby the custodian will have limited or no liability.

Derivatives Risk - The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk. In addition, there may be an absence of a liquid market for any particular instrument at any particular time.

Emerging Markets Risk - The risks for investments in non-U.S. securities are greater in emerging markets, which can be more vulnerable to recessions, currency volatility, liquidity risk, inflation and market failure.

Mainland China Investment Risk - Political, social or economic disruptions in China or in other countries in the region, including conflicts and currency devaluations, may adversely affect the values of Chinese securities and thus the fund's holdings.

Market Risk - The market price of securities owned by the fund may go up or down, sometimes rapidly or unpredictably. A security may decline in value due to factors affecting the issuer or securities markets generally or particular industries represented in the securities markets.

Smaller Company Securities Risk - Securities of companies with smaller market capitalisations tend to be more volatile and less liquid than larger company stocks.

Stock Connect Risk - The fund may be subject to the risks associated with stock market access between mainland China and Hong Kong including among others, operational risk, differences in trading days and custody, clearing and settlement risk.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Risks" and "Risk Management Processes" in the prospectus, which is available at allspringglobal.com.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|--|------|
| Entry Charge | None |
| Exit Charge | None |
| This is the maximum that might be taken out of your money before it is invested. | |

| Charges taken from the fund over a year | |
|---|-------|
| Ongoing Charges | 1.19% |
| Charges taken from the fund under certain specific conditions | |
| Performance Fee | None |

The **entry** and **exit charges** shown are the highest possible charges you would pay. Please consult your advisor or distributor to find out your actual charges, which might be less. Because the class does not have twelve months of operating history, the **ongoing charges** reflect the total expense ratio cap put in place by the Investment Manager. Any costs that would cause the capped total expense ratio to be exceeded will be absorbed by the Investment Manager. **Ongoing charges** may vary from year to year. The **ongoing charges** do not include the portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about the fund's charges, please see "Fees and Expenses" in the prospectus.

Past Performance

Past performance is not a guide to future performance. Performance calculations are based on the net asset value, include ongoing charges but exclude entry and exit charges, if any, and are calculated in GBP with income reinvested. The base currency of the fund is USD.

Fund launch date: 2012. Share Class launch date: 2012.

The chart shows performance against the MSCI Emerging Markets Index (GBP). The fund does not track the index.

This share class ceased operations on 28 October 2022 and re-launched on 21 May 2024. Performance during the period in which the share class was not in operation is based upon the performance of a similar share class.
