What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.

Allspring (Lux) Worldwide Fund - Global Income Fund (the "Sub-Fund") seeks total return, by investing, under normal circumstances, at least two-thirds of its total assets in income-producing securities which may include Green Bonds and perpetual bonds, (up to 100% of its total assets) issued by issuers domiciled anywhere in the world. The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.

The Sub-Fund may invest up to 100% of its total assets in debt securities that are below investment-grade (i.e., BB+ or lower by Standard & Poor's or Ba1 or lower by Moody's or an equivalent quality rating from another internationally recognised credit ratings organisation or, if unrated, are deemed by the Sub-Investment Managers to be of comparable quality) at the time of purchase; up to 50% of its total assets in securitised assets, including mortgage-related and asset-backed securities issued or guaranteed by US government sponsored agencies, which may include in majority investments in mortgage to-be-announced ("TBA") securities. Within this limit of 50%, a maximum of 20% of its total assets may be invested in securitised assets in scope of Regulation (EU) 2017/2402, including non-US government agency issued mortgage-related and asset-backed securities; up to 50% of its total assets in emerging markets securities; up to 25% of its total assets in preferred stocks; up to 25% of its total assets in unrated securities; up to 10% of its total assets in contingent convertible securities; and up to 10% of its total assets in catastrophe bonds. The Sub-Fund may invest no more than 10% of its total assets in distressed or defaulted debt securities. Distressed securities are those debt securities rated below Caa2 by Moody's or CCC by Standard & Poor's. Defaulted securities are those debt securities rated C by Moody's or D by Standard & Poor's. The Sub-Fund will utilise the Allspring ESGiQ (ESG Information Quotient), a proprietary rating system created to assess ESG risk and materiality. The ESGiQ overall score assigns an overall rating for corporate issuers on a scale of 1 to 5, whereby 2 through 1- reflects low or lagging ESG issuers and 3+ through 5+ reflects high or leading ESG issuers. Sovereign issuers are assigned a quantitative rating on a scale of 1-10 whereby 1 through 4 reflects low or lagging issuers and 6 through 10 reflects high or leading ESG issuers. At least 50% of the total assets of the Sub-Fund will have an ESGiQ rating, of which two-thirds will be in high or leading and will exclude low or lagging. Municipal securities, cash, derivatives and investments in underlying Sub-Funds will not be required to have an ESGiQ score.

Through the use of a negative screening process, the Sub-Fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under [allspringglobal.com](https://www.allspringglobal.com). Shareholders may also request a copy from the Fund or the Management Company. The Sub-Fund may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes. The investment process for both asset allocation and security selection focus on the value-driven measures that are used by the Sub-Investment Managers when managing sector assignments such as high yield bonds, global bonds, emerging markets, investment-grade bonds, and mortgage-related and asset-backed securities.

The Sub-Fund is actively managed but uses the Bloomberg Global Aggregate Index for performance comparison. The investments of the Sub-Fund may deviate significantly from the components of their respective weightings in the benchmark.

You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").

This share class does not distribute dividends. Income is reinvested in the Sub-Fund.

Depository	Brown Brothers Harriman (Luxembourg) S.C.A.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2025 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment GBP 10,000		
Scenarios	If you exit after 1 year	If you exit after 5 years
Total costs	65 GBP	349 GBP
Annual cost impact(*)	0.7 %	0.7 %

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 1.8% before costs and 1.2% after costs.
