

Alternative Funds

Fund	Class R6
Allspring Alternative Risk Premia Fund	WRPRX

**SUPPLEMENT TO THE PROSPECTUSES AND
STATEMENT OF ADDITIONAL INFORMATION
OF
ALLSPRING ALTERNATIVE FUNDS
For the Allspring Alternative Risk Premia Fund (the “Fund”)**

Effective immediately, Monisha Jayakumar is removed as a portfolio manager to the Fund. All references to Monisha Jayakumar in the Fund’s prospectuses and Statement of Additional Information are hereby removed.

Effective immediately, Kevin Cole, CFA is added as a portfolio manager to the Fund.

I. Prospectus

In the section entitled “Fund Summary - Fund Management” for the Fund, the Fund Management table is replaced with the following:

Manager	Sub-Adviser	Portfolio Manager, Title/Managed Since
Allspring Funds Management, LLC	Allspring Global Investments (UK) Limited	Eddie Cheng, CFA , Portfolio Manager / 2018
	Allspring Global Investments, LLC	Petros N. Bocray, CFA, FRM , Portfolio Manager / 2018 Kevin Cole, CFA , Portfolio Manager / 2024

In the section entitled “Management of the Funds - The Sub-Adviser and Portfolio Managers”, the table is amended to include the following:

Kevin Cole, CFA	Mr. Cole joined Allspring Investments or one of its predecessor firms in 2016, where he currently serves as a Portfolio Manager for the Systematic Edge team.
------------------------	---

II. Statement of Additional Information

In the sections entitled “Manager and Other Service Providers - Portfolio Managers”, the Management of Other Accounts and Beneficial Ownership tables are amended to add the following information for this Funds:

Allspring Investments

Kevin Cole, CFA ¹	Registered Investment Companies	
	Number of Accounts	0
	Total Assets Managed	\$0
	Number of Accounts Subject to Performance Fee	0
	Assets of Accounts Subject to Performance Fee	\$0
	Other Pooled Investment Vehicles	
	Number of Accounts	0
	Total Assets Managed	\$0
	Number of Accounts Subject to Performance Fee	0
	Assets of Accounts Subject to Performance Fee	\$0
	Other Accounts	
	Number of Accounts	0
	Total Assets Managed	\$0
	Number of Accounts Subject to Performance Fee	0
	Assets of Accounts Subject to Performance Fee	\$0

1. Kevin Cole, CFA became a portfolio manager of the Fund on January 24, 2024. The information presented in this table is as of June 30, 2023, at which time Kevin Cole, CFA was not a portfolio manager of the Fund.

Portfolio Manager	Fund	Dollar Range of Holdings in Fund
Allspring Investments¹		
Kevin Cole, CFA ²	Alternative Risk Premia Fund	\$0

1. Amounts included in the table above may include notional investments held by the portfolio manager through a deferred compensation vehicle.

2. Kevin Cole, CFA became a portfolio manager of the Fund on January 24, 2024. The information presented in this table is as of June 30, 2023, at which time Kevin Cole, CFA was not a portfolio manager of the Fund.

Alternative Risk Premia Fund Summary

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.60%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.88%
Acquired Fund Fees and Expenses	0.03%
Total Annual Fund Operating Expenses	1.51%
Fee Waivers	-0.86%
Total Annual Fund Operating Expenses After Fee Waivers¹	0.65%

1. The Manager has contractually committed through October 31, 2024, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.62% for Class R6. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$66
3 Years	\$392
5 Years	\$742
10 Years	\$1,728

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 0% of the average value of its portfolio. However, the Fund’s portfolio turnover rate is calculated without regard to transactions involving certain short-term instruments or derivatives. If such transactions were included in the calculation, the Fund would have a higher portfolio turnover rate.

Principal Investment Strategies

The Fund seeks to provide investors with exposure to sources of excess return, known as alternative risk premia (ARP), which result from systematic risks and/or behavioral biases existing within the financial markets. We believe that ARP exist as compensation for investors that are willing to assume particular market risks that other investors are unable or unwilling to assume because of structural constraints or behavioral biases. The return patterns of ARP have historically displayed low correlations with one another and with traditional asset classes. We seek to maintain low correlations with stock and bond investments while producing a positive return over a 3 to 5 year period.

In order to capture various ARP, the Fund will establish both long and short positions in equities, fixed income, currencies and commodities directly or with derivatives. The derivative holdings will include futures, forwards, and swaps. The equity holdings are diversified across global developed market listed equities of any market capitalization or related derivatives. For purposes of maintaining collateral for derivative positions, a significant portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds and/or U.S. Government securities. Other than the fixed income securities that the Fund will hold directly for the purpose of maintaining collateral, the Fund's fixed income positions will primarily be established through treasury and interest rate futures.

We will use a dynamic approach to maintain a balanced risk allocation approach to establish the Fund's exposures to ARP, typically investing in a combination of the following strategies:

- **Value.** We define value as buying assets with lower valuations and selling assets with higher valuations. Valuations relate market prices to some financial metric relevant to an asset class. For example, buying equities with lower price to book or price to equity ratios and selling assets with higher price to book or price to equity ratios. The value premia may be captured in multiple asset classes, including equities, fixed income, currencies and commodities.
- **Momentum.** We define momentum as buying assets with strong recent performance and selling assets with weak recent performance. The momentum premia may be captured in multiple asset classes, including equities, fixed income, currencies and commodities.
- **Carry.** Carry strategies seek to capture the tendency for higher yielding assets to provide higher total returns versus lower yielding assets. One example is to buy higher yielding currencies while selling lower yielding currencies. Carry strategies may be employed on multiple asset classes, including fixed income, currencies and commodities.

The Fund utilizes the services of two sub-advisers, Allspring Global Investments (UK) Limited ("Allspring UK") and Allspring Global Investments, LLC ("Allspring Investments"). Allspring UK is responsible for making allocation decisions among the various asset classes and ARP styles, and these allocations may change over time. Allspring Investments is solely responsible for managing the Fund's long/short equity positions (excluding equity index futures). Allspring UK and Allspring Investments are jointly responsible for managing the remainder of the Fund's portfolio.

Under normal market conditions, the Fund may invest up to 15% of its net assets in the common or preferred stock of a subsidiary of the Fund that typically invests directly or indirectly in commodity-linked derivatives such as commodity forwards, commodity futures, commodity swaps, swaps on commodity futures and other commodity-linked derivative securities; it may also invest in all other securities allowed in the Fund. These holdings may contribute more than 15% of the Fund's risk allocation.

The investment techniques employed by the Fund create leverage. As a result, the sum of the Fund's investment exposures will typically exceed the amount of the Fund's net assets. These exposures may vary over time. We expect gross notional exposure of the Fund to be in a range of 400% to 1200% of the net asset value of the Fund under normal market conditions; leverage may be significantly different (higher or lower) as deemed necessary by the Investment Manager. We expect net notional exposure of the Fund to be in a range of -200% to 200% of the net asset value of the Fund under normal market conditions.

Fund volatility is a statistical measurement of the dispersion of a portfolio's returns as measured by the annualized standard deviation of its returns. By certain definitions, higher volatility tends to indicate higher risk. We will target an annualized Fund volatility of between 8% and 10%. The actual volatility may be higher or lower depending on market conditions as actual volatility can and will differ from targeted volatility.

Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

Alternative Risk Premia Investment Risk. The Fund's ability to achieve its investment objective depends largely upon the portfolio managers' successful evaluation of the risks, potential returns, and correlation properties with respect to the various risk premia in which the Fund invests.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than mitigate risk. Certain derivative instruments may be difficult to sell when the portfolio manager believes it would be appropriate to do so, or the other party to a derivative contract may be unwilling or unable to fulfill its contractual obligations.

Leverage Risk. Certain transactions, such as derivatives, may give rise to a form of leverage. Leverage increases the Fund's portfolio losses when the value of its investments declines. Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying asset, rate or index may result in a loss substantially greater than the amount invested in the derivative itself. Leveraging may cause a Fund to be more volatile than if the Fund had not been leveraged.

Debt Securities Risk. Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer's credit quality or financial strength declines. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Very low or negative interest rates may magnify interest rate risk.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer's products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

Foreign Currency Contracts Risk. A Fund that enters into forwards or other foreign currency contracts, which are a type of derivative, is subject to the risk that the portfolio manager may be incorrect in his or her judgment of future exchange rate changes.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Growth/Value Investing Risk. Securities that exhibit growth or value characteristics tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Short Sales Risk. Short selling is generally considered speculative, has the potential for unlimited loss and may involve leverage, which can magnify a Fund's exposure to assets that decline in value and increase the volatility of the Fund's net asset value.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than those of larger companies.

Subsidiary Risk. The value of a Fund's investment in its Cayman Islands subsidiary may be adversely impacted by the risks associated with the underlying derivatives investments of the subsidiary. In addition, changes in the laws or regulations of the United States or the Cayman Islands, under which the Fund and the subsidiary, respectively, are organized, could result in the inability of the Fund or the subsidiary to continue to operate as described in the prospectus and could negatively affect the Fund and its shareholders.

Swaps Risk. Depending on their structure, swap agreements and options to enter into swap agreements ("swaptions"), both of which are types of derivatives, may increase or decrease a Fund's exposure to long- or short-term interest rates, foreign currency values, mortgage-backed securities, corporate borrowing rates, or credit events or other reference points such as security prices or inflation rates.

U.S. Government Obligations Risk. U.S. Government obligations may be adversely impacted by changes in interest rates, and securities issued or guaranteed by U.S. Government agencies or government-sponsored entities may not be backed by the full faith and credit of the U.S. Government. U.S. Government obligations may be adversely affected by a default by, or decline in the credit quality, of the U.S. Government.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance is no guarantee of future results. Current month-end performance is available on the Fund's website at www.allspringglobal.com.

Calendar Year Total Returns for Class R6 as of 12/31 each year

Average Annual Total Returns for the periods ended 12/31/2022

	Inception Date of Share Class	1 Year	5 Year	Since Inception
Class R6	1/29/2019	10.39%	-	-1.49%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)		-13.01%	-	-0.11%
ICE BofA 3-Month U.S. Treasury Bill Index (reflects no deduction for fees, expenses, or taxes)		1.47%	-	1.09%

Fund Management

Manager	Sub-Adviser	Portfolio Manager, Title/Managed Since
Allspring Funds Management, LLC	Allspring Global Investments (UK) Limited	Eddie Cheng, CFA , Portfolio Manager / 2018
	Allspring Global Investments, LLC	Petros N. Bocray, CFA, FRM , Portfolio Manager / 2018 Monisha Jayakumar , Portfolio Manager / 2018

Purchase and Sale of Fund Shares

Class R6 shares generally are available only to certain retirement plans, including: 401(k) plans, 457 plans, profit sharing and money purchase pension plans, defined benefit plans, target benefit plans, and non-qualified deferred compensation plans. Class R6 shares also are generally available only to retirement plans where plan level or omnibus accounts are held on the books of the Fund. Class R6 shares also are available to funds of funds including those managed by Allspring Funds Management. Class R6 shares generally are not available to retail accounts but may be offered through intermediaries for the accounts of their customers to certain institutional and fee-based investors, and in each case, only if a dealer agreement is in place with Allspring Funds Distributor, LLC to offer Class R6 shares.

Institutions Purchasing Fund Shares

Minimum Initial Investment

Class R6: Eligible investors are not subject to a minimum initial investment (intermediaries may require different minimum investment amounts)

Minimum Additional Investment

Class R6: None (intermediaries may require different minimum additional investment amounts)

Tax Information

By investing in a Fund through a tax-deferred retirement account, you will not be subject to tax on dividends and capital gains distributions from the Fund or the sale of Fund shares if those amounts remain in the tax-deferred account.

Distributions taken from retirement plan accounts generally are taxable as ordinary income. For special rules concerning tax-deferred retirement accounts, including applications, restrictions, tax advantages, and potential sales charge waivers, contact your investment professional. To determine if a retirement plan may be appropriate for you and to obtain further information, consult your tax adviser.

Details About the Fund

Alternative Risk Premia Fund

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investment Strategies

The Fund seeks to provide investors with exposure to sources of excess return, known as alternative risk premia (ARP), which result from systematic risks and/or behavioral biases existing within the financial markets. We believe that ARP exist as compensation for investors that are willing to assume particular market risks that other investors are unable or unwilling to assume because of structural constraints or behavioral biases. The return patterns of ARP have historically displayed low correlations with one another and with traditional asset classes. We seek to maintain low correlations with stock and bond investments while producing a positive return over a 3 to 5 year period.

In order to capture various ARP, the Fund will establish both long and short positions in equities, fixed income, currencies and commodities directly or with derivatives. The derivative holdings will include futures, forwards, and swaps. The equity holdings are diversified across global developed market listed equities of any market capitalization or related derivatives. For purposes of maintaining collateral for derivative positions, a significant portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds and/or U.S. Government securities. Other than the fixed income securities that the Fund will hold directly for the purpose of maintaining collateral, the Fund's fixed income positions will primarily be established through treasury and interest rate futures.

We will use a dynamic approach to maintain a balanced risk allocation approach to establish the Fund's exposures to ARP, typically investing in a combination of the following strategies:

- **Value.** We define value as buying assets with lower valuations and selling assets with higher valuations. Valuations relate market prices to some financial metric relevant to an asset class. For example, buying equities with lower price to book or price to equity ratios and selling assets with higher price to book or price to equity ratios. The value premia may be captured in multiple asset classes, including equities, fixed income, currencies and commodities.
- **Momentum.** We define momentum as buying assets with strong recent performance and selling assets with weak recent performance. The momentum premia may be captured in multiple asset classes, including equities, fixed income, currencies and commodities.
- **Carry.** Carry strategies seek to capture the tendency for higher yielding assets to provide higher total returns versus lower yielding assets. One example is to buy higher yielding currencies while selling lower yielding currencies. Carry strategies may be employed on multiple asset classes, including fixed income, currencies and commodities.

The Fund utilizes the services of two sub-advisers, Allspring Global Investments (UK) Limited ("Allspring UK") and Allspring Global Investments, LLC ("Allspring Investments"). Allspring UK is responsible for making allocation decisions among the various asset classes and ARP styles, and these allocations may change over time. Allspring Investments is solely responsible for managing the Fund's long/short equity positions (excluding equity index futures). Allspring UK and Allspring Investments are jointly responsible for managing the remainder of the Fund's portfolio.

Under normal market conditions, the Fund may invest up to 15% of its net assets in the common or preferred stock of a subsidiary of the Fund that typically invests directly or indirectly in commodity-linked derivatives such as commodity forwards, commodity futures, commodity swaps, swaps on commodity futures and other commodity-linked derivative securities; it may also invest in all other securities allowed in the Fund. These holdings may contribute more than 15% of the Fund's risk allocation.

The investment techniques employed by the Fund create leverage. As a result, the sum of the Fund's investment exposures will typically exceed the amount of the Fund's net assets. These exposures may vary over time. We expect gross notional exposure of the Fund to be in a range of 400% to 1200% of the net asset value of the Fund under normal market conditions; leverage may be significantly different (higher or lower) as deemed necessary by the Investment Manager. We expect net notional exposure of the Fund to be in a range of -200% to 200% of the net asset value of the Fund under normal market conditions.

Fund volatility is a statistical measurement of the dispersion of a portfolio's returns as measured by the annualized standard deviation of its returns. By certain definitions, higher volatility tends to indicate higher risk. We will target an

annualized Fund volatility of between 8% and 10%. The actual volatility may be higher or lower depending on market conditions as actual volatility can and will differ from targeted volatility.

We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other funds and repurchase agreements, or make other short-term investments for purposes of maintaining liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During such periods, the Fund may not achieve its objective.

Principal Investment Risks

The Fund is primarily subject to the risks mentioned below.

- Market Risk
- Alternative Risk Premia Investment Risk
- Derivatives Risk
- Leverage Risk
- Debt Securities Risk
- Equity Securities Risk
- Foreign Currency Contracts Risk
- Foreign Investment Risk
- Futures Contract Risk
- Growth/Value Investing Risk
- Management Risk
- Short Sales Risk
- Smaller Company Securities Risk
- Subsidiary Risk
- Swaps Risk
- U.S. Government Obligations Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Description of Principal Investment Risks

Understanding the risks involved in fund investing will help you make an informed decision that takes into account your risk tolerance and preferences. The risks that are most likely to have a material effect on a particular Fund as a whole are called “principal risks.” The principal risks for the Fund have been previously identified and are described below (in alphabetical order). Additional information about the principal risks is included in the Statement of Additional Information.

Alternative Risk Premia Investment Risk. The Fund’s ability to achieve its investment objective depends largely upon the portfolio managers’ successful evaluation of the risks, potential returns, and correlation properties with respect to the various risk premia in which the Fund invests. There is a risk that the returns provided by any individual risk premium may be subject to high volatility. Further, the Fund’s ability to achieve its investment objective also depends on the successful allocation of the Fund’s assets among various risk premia and asset classes, and you could lose money on your investment in the Fund as a result of these allocations. There is also a risk that the Fund’s investments will correlate with the performance of equity and fixed income securities to a greater degree than anticipated.

Debt Securities Risk. Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer’s credit quality or financial strength declines. The credit quality of a debt security may deteriorate rapidly and cause significant deterioration in the Fund’s net asset value. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Some debt securities give the issuers the option to call, redeem or prepay the securities before their maturity dates. If an issuer calls, redeems or prepays a debt security during a time of declining interest rates, the Fund might have to reinvest the proceeds in a security offering a lower yield, and therefore might not benefit from any increase in value as a result of declining interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund performance to the extent the Fund is exposed to such interest rates. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. Changes in market conditions and government policies may lead to periods of heightened volatility in the debt securities market, reduced liquidity Fund investments and an increase in Fund redemptions.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the derivatives’ underlying assets, indexes or rates and the derivatives themselves, which may be magnified by certain features of the derivatives. These risks are heightened when derivatives are used to enhance a Fund’s return or as a substitute for a position or security, rather than solely to hedge (or mitigate) the risk of a position or security held by the Fund. The success of a derivative strategy will be affected by the portfolio manager’s ability to assess and predict market or economic developments and their impact on the derivatives’ underlying assets, indexes or reference rates, as well as the derivatives themselves. Certain derivative instruments may become illiquid and, as a result, may be difficult to sell when the portfolio manager believes it would be appropriate to do so. Certain derivatives create leverage, which can magnify the impact of a decline in the value of their underlying assets, indexes or reference rates, and increase the volatility of the Fund’s net asset value. Certain derivatives (e.g., over-the-counter swaps) are also subject to the risk that the counterparty to the derivative contract will be unwilling or unable to fulfill its contractual obligations, which may cause a Fund to lose money, suffer delays or incur costs arising from holding or selling an underlying asset. Changes in laws or regulations may make the use of derivatives more costly, may limit the availability of derivatives, or may otherwise adversely affect the use, value or performance of derivatives.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer’s products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Investing in equity securities poses risks specific to an issuer, as well as to the particular type of company issuing the equity securities. For example, investing in the equity securities of small- or mid-capitalization companies can involve greater risk than is customarily associated with investing in stocks of larger, more-established companies.

Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments. Negative news or a poor outlook for a particular industry or sector can cause the share prices of securities of companies in that industry or sector to decline. This risk may be heightened for a Fund that invests a substantial portion of its assets in a particular industry or sector.

Foreign Currency Contracts Risk. A Fund that enters into forwards or other foreign currency contracts, which are a type of derivative, is subject to the risk that the portfolio manager may be incorrect in his or her judgment of future exchange rate changes. The Fund's gains from positions in foreign currency contracts may accelerate and/or lead to recharacterization of the Fund's income or gains and its distributions to shareholders. The Fund's losses from such positions may also lead to recharacterization of the Fund's income and its distributions to shareholders and may cause a return of capital to Fund shareholders.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign companies may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. Foreign investments may involve exposure to changes in foreign currency exchange rates. Such changes may reduce the U.S. dollar value of the investments. Foreign investments may be subject to additional risks, such as potentially higher withholding and other taxes, and may also be subject to greater trade settlement, custodial, and other operational risks than domestic investments. Certain foreign markets may also be characterized by less stringent investor protection and disclosure standards.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Growth/Value Investing Risk. Securities that exhibit certain characteristics, such as growth characteristics or value characteristics, tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions. As a result, a Fund's performance may at times be worse than the performance of other mutual funds that invest more broadly or in securities that exhibit different characteristics.

Leverage Risk. Certain transactions, such as derivatives, may give rise to a form of leverage (i.e., the Fund's exposure to underlying securities, assets or currencies exceeds its net asset value). Leverage increases the Fund's portfolio losses when the value of its investments declines. Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying asset, rate or index may result in a loss substantially greater than the amount invested in the derivative itself. Leveraging may cause a Fund to be more volatile than if the Fund had not been leveraged. The use of leverage may cause a Fund to liquidate portfolio positions when it may not be advantageous to do so.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce the returns expected, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Market Risk. The values of, and/or the income generated by, securities held by a Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Political, geopolitical, natural and other events, including war, terrorism, trade disputes, government shutdowns, market closures, inflation, natural and environmental disasters, epidemics, pandemics and other public health crises and related events have led, and in the future may lead, to economic uncertainty, decreased economic activity, increased market volatility and other disruptive effects on U.S. and global economies and markets. Such events may have significant adverse direct or indirect effects on a Fund and its investments. In addition, economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions.

Short Sales Risk. Short selling is generally considered speculative, has the potential for unlimited loss and may involve leverage, which can magnify a Fund's exposure to assets that decline in value and increase the volatility of the Fund's net asset value. If the price of a security which the Fund has sold short increases between the time of the short sale and when the position is closed out, the Fund will incur a loss equal to the increase in price from the time of the short sale plus any related interest payments, dividends, transaction or other costs. There can be no assurance that the Fund will be able to close out a short position at any particular time or at an acceptable price. Purchasing a security to cover a short position can itself cause the price of the security to rise, potentially exacerbating a loss or reducing a gain. In

addition, the Fund is subject to the risk that the lender of a security will terminate the loan at a time when the Fund is unable to borrow the same instrument from another lender. A Fund that uses short sales is subject to the risk that its prime broker will be unwilling or unable to perform its contractual obligations. Regulatory restrictions limit the extent to which the Fund may engage in short sales.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than those of larger companies. Smaller companies may have no or relatively short operating histories, limited financial resources or may have recently become public companies. Some of these companies have aggressive capital structures, including high debt levels, or are involved in rapidly growing or changing industries and/or new technologies.

Subsidiary Risk. The value of a Fund's investment in its Cayman Islands subsidiary may be adversely impacted by the risks associated with the underlying derivatives investments of the subsidiary. In addition, changes in the laws or regulations of the United States or the Cayman Islands, under which the Fund and the subsidiary, respectively, are organized, could result in the inability of the Fund or the subsidiary to continue to operate as described in the prospectus and could negatively affect the Fund and its shareholders.

Swaps Risk. Depending on their structure, swap agreements and options to enter into swap agreements ("swaptions"), both of which are types of derivatives, may increase or decrease a Fund's exposure to long- or short-term interest rates, foreign currency values, mortgage-backed securities, corporate borrowing rates, or credit events or other reference points such as security prices or inflation rates.

U.S. Government Obligations Risk. U.S. Government obligations may be adversely impacted by changes in interest rates, and securities issued or guaranteed by U.S. Government agencies or government-sponsored entities may not be backed by the full faith and credit of the U.S. Government. If a government-sponsored entity is unable to meet its obligations or its creditworthiness declines, the performance of a Fund that holds securities issued or guaranteed by the entity will be adversely impacted. U.S. Government obligations may be adversely affected by a default by, or decline in the credit quality, of the U.S. Government.

Portfolio Holdings Information

A description of the Allspring Funds' policies and procedures with respect to disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information.

Pricing Fund Shares

The Fund's net asset value ("NAV") is the value of a single share. The NAV is calculated as of the close of regular trading on the New York Stock Exchange ("NYSE") (generally 4:00 p.m. Eastern time) on each day that the NYSE is open, although the Fund may deviate from this calculation time under unusual or unexpected circumstances. The NAV is calculated separately for each class of shares of a multiple-class Fund. The most recent NAV for each class of a Fund is available at allspringglobal.com. To calculate the NAV of the Fund's shares, the Fund's assets are valued and totaled, liabilities are subtracted, and the balance, called net assets, is divided by the number of shares outstanding. The price at which a purchase or redemption request is processed is based on the next NAV calculated after the request is received in good order. Generally, NAV is not calculated, and purchase and redemption requests are not processed, on days that the NYSE is closed for trading; however, under unusual or unexpected circumstances, the Fund may elect to remain open even on days that the NYSE is closed or closes early. To the extent that the Fund's assets are traded in various markets on days when the Fund is closed, the value of the Fund's assets may be affected on days when you are unable to buy or sell Fund shares. Conversely, trading in some of the Fund's assets may not occur on days when the Fund is open.

With respect to any portion of the Fund's assets that may be invested in other mutual funds, the value of the Fund's shares is based on the NAV of the shares of the other mutual funds in which the Fund invests. The valuation methods used by mutual funds in pricing their shares, including the circumstances under which they will use fair value pricing and the effects of using fair value pricing, are included in the prospectuses of such funds. To the extent the Fund invests a portion of its assets in non-registered investment vehicles, the Fund's interests in the non-registered vehicles are fair valued at NAV.

With respect to the Fund's assets invested directly in securities, the Fund's investments are generally valued at current market prices. Equity securities, options and futures are generally valued at the official closing price or, if none, the last reported sales price on the primary exchange or market on which they are listed (closing price). Equity securities that are not traded primarily on an exchange are generally valued at the quoted bid price obtained from a broker-dealer.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

We are required to depart from these general valuation methods and use fair value pricing methods to determine the values of certain investments if we believe that the closing price or the quoted bid price of a security, including a security that trades primarily on a foreign exchange, does not accurately reflect its current market value as of the time the Fund calculates its NAV. The closing price or the quoted bid price of a security may not reflect its current market value if, among other things, a significant event occurs after the closing price or quoted bid price are made available, but before the time as of which the Fund calculates its NAV, that materially affects the value of the security. We use various criteria, including a systemic evaluation of U.S. market moves after the close of foreign markets, in deciding whether a foreign security's market price is still reliable and, if not, what fair market value to assign to the security. In addition, we use fair value pricing to determine the value of investments in securities and other assets, including illiquid securities, for which current market quotations or evaluated prices from a pricing service or broker-dealer are not readily available.

The fair value of the Fund's securities and other assets is determined in good faith pursuant to policies and procedures adopted by the Fund's Board of Trustees. Pursuant to such policies and procedures, the Board has appointed the Manager as the Fund's valuation designee (the "Valuation Designee") to perform all fair valuations of the Fund's portfolio investments, subject to the Board's oversight. As the Valuation Designee, the Manager has established procedures for its fair valuation of the Fund's portfolio investments. These procedures address, among other things, determining when market quotations are not readily available or reliable and the methodologies to be used for determining the fair value of investments, as well as the use and oversight of third-party pricing services for fair valuation. In light of the judgment involved in making fair value decisions, there can be no assurance that a fair value assigned to a particular security is accurate or that it reflects the price that the Fund could obtain for such security if it were to sell the security at the time as of which fair value pricing is determined. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the closing price or quoted bid price. See the Statement of Additional Information for additional details regarding the determination of NAVs.

Management of the Fund

The Manager

Allspring Funds Management, LLC (“Allspring Funds Management”), headquartered at 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203, provides advisory and Fund level administrative services to the Fund pursuant to an investment management agreement (the “Management Agreement”). Allspring Funds Management is a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P. Allspring Funds Management is a registered investment adviser that provides advisory services for registered mutual funds, closed-end funds and other funds and accounts.

Allspring Funds Management is responsible for implementing the investment objectives and strategies of the Fund. Allspring Funds Management’s investment professionals review and analyze the Fund’s performance, including relative to peer funds, and monitor the Fund’s compliance with its investment objectives and strategies. Allspring Funds Management is responsible for reporting to the Board on investment performance and other matters affecting the Fund. When appropriate, Allspring Funds Management recommends to the Board enhancements to Fund features, including changes to Fund investment objectives, strategies and policies. Allspring Funds Management also communicates with shareholders and intermediaries about Fund performance and features.

Allspring Funds Management is also responsible for providing Fund-level administrative services to the Fund, which include, among others, providing such services in connection with the Fund’s operations; developing and implementing procedures for monitoring compliance with regulatory requirements and compliance with the Fund’s investment objectives, policies and restrictions; and providing any other Fund-level administrative services reasonably necessary for the operation of the Fund, other than those services that are provided by the Fund’s transfer and dividend disbursing agent, custodian and fund accountant.

To assist Allspring Funds Management in implementing the investment objectives and strategies of the Fund, Allspring Funds Management may contract with one or more sub-advisers to provide day-to-day portfolio management services to the Fund. Allspring Funds Management employs a team of investment professionals who identify and recommend the initial hiring of any sub-adviser and oversee and monitor the activities of any sub-adviser on an ongoing basis. Allspring Funds Management retains overall responsibility for the investment activities of the Fund.

A discussion regarding the basis for the Board’s approval of the Management Agreement and any applicable sub-advisory agreements for the Fund will be available in the Fund’s Annual report for the period ended June 30th.

For the Fund’s most recent fiscal year end, the management fee paid to Allspring Funds Management pursuant to the Management Agreement, net of any applicable waivers and reimbursements, was as follows:

Management Fees Paid

	As a % of average daily net assets
Alternative Risk Premia Fund	0.00%

The Sub-Advisers and Portfolio Managers

The following sub-advisers and portfolio managers provide day-to-day portfolio management services to the Fund. These services include making purchases and sales of securities and other investment assets for the Fund, selecting broker-dealers, negotiating brokerage commission rates and maintaining portfolio transaction records. The sub-advisers are compensated for their services by Allspring Funds Management from the fees Allspring Funds Management receives for its services as manager to the Fund. The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund.

Allspring Global Investments (UK) Limited ("Allspring (UK)"), is a registered investment adviser located at 30 Moorgage, London EC2R 6PJ. Allspring UK, an affiliate of Allspring Funds Management and wholly owned subsidiary of Allspring Global Investments Holdings, LLC, provides investment advisory services to banking or thrift institutions, investment companies, pension and profit sharing plans, corporations, and state or municipal government entities.

Eddie Cheng, CFA	Mr. Cheng joined Allspring UK or one of its predecessors firms in 2018, where he currently serves as head of International Portfolio Management within the Multi-Asset Solutions team. Prior to joining Allspring UK, he held a similar role with the Multi-Asset team at Schroders.
-------------------------	--

Allspring Global Investments, LLC ("Allspring Investments") is a registered investment adviser located at 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203. Allspring Investments, an affiliate of Allspring Funds Management and wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is a multi-boutique asset management firm committed to delivering superior investment services to institutional clients, including mutual funds.

Petros N. Bocray, CFA, FRM	Mr. Bocray joined Allspring Investments or one of its predecessor firms in 2006, where he currently serves as a Portfolio Manager. Prior to joining the Multi-Asset Solutions team, he held a similar role with the Quantitative Strategies group at Allspring Investments where he co-managed several of the team's portfolios.
Monisha Jayakumar	Ms. Jayakumar joined Allspring Investments or one of its predecessor firms in 2009, where she currently serves as a portfolio manager on the Systematic Edge Equities team.

Multi-Manager Arrangement

The Fund and Allspring Funds Management have obtained an exemptive order from the SEC that permits Allspring Funds Management, subject to Board approval, to select certain sub-advisers and enter into or amend sub-advisory agreements with them, without obtaining shareholder approval. The SEC order extends to sub-advisers that are not otherwise affiliated with Allspring Funds Management or the Fund, as well as sub-advisers that are wholly-owned subsidiaries of Allspring Funds Management or of a company that wholly owns Allspring Funds Management. In addition, the SEC staff, pursuant to no-action relief, has extended multi-manager relief to any affiliated sub-adviser, such as affiliated sub-advisers that are not wholly-owned subsidiaries of Allspring Funds Management or of a company that wholly owns Allspring Funds Management, provided certain conditions are satisfied (all such sub-advisers covered by the order or relief, "Multi-Manager Sub-Advisers").

As such, Allspring Funds Management, with Board approval, may hire or replace Multi-Manager Sub-Advisers for each Fund that is eligible to rely on the order or relief. Allspring Funds Management, subject to Board oversight, has the responsibility to oversee Multi-Manager Sub-Advisers and to recommend their hiring, termination and replacement. If a new sub-adviser is hired for a Fund pursuant to the order or relief, the Fund is required to notify shareholders within 90 days. The Fund is not required to disclose the individual fees that Allspring Funds Management pays to a Multi-Manager Sub-Adviser.

Account Information

Share Class Eligibility

Class R6 shares are generally available for employer sponsored retirement and benefit plans and through intermediaries for the accounts of their customers to certain institutional and fee-based investors, and in each case, only if a dealer agreement is in place with Allspring Funds Distributor, LLC to offer Class R6 shares. The following investors may purchase Class R6 shares:

- Employer sponsored retirement plans held in plan level or omnibus accounts, including but not limited to: 401(k) plans, 457 plans, profit sharing and money purchase pension plans, defined benefit plans, target benefit plans and non-qualified deferred compensation plans;
- Employee benefit plan programs;
- Broker-dealer managed account or wrap programs that charge an asset-based fee where omnibus accounts are held on the books of the Fund;
- Registered investment adviser mutual fund wrap programs or other accounts that charge a fee for advisory, investment, consulting or similar services where omnibus accounts are held on the books of the Fund;
- Private bank and trust company managed accounts or wrap programs that charge an asset-based fee;
- Funds of funds, including those managed by Allspring Funds Management;
- Institutional investors purchasing shares through an intermediary where omnibus accounts are held on the books of the Fund including trust departments, insurance companies, foundations, local, city, and state governmental institutions, private banks, endowments, non-profits, and charitable organizations;
- Investors purchasing shares through an intermediary, acting solely as a broker on behalf of its customers, that holds such shares in an omnibus account and charges investors a transaction based commission outside of the Fund. In order to offer Fund shares, an intermediary must have an agreement with the Fund's distributor authorizing the use of the share class within this type of platform.

The information in this Prospectus is not intended for distribution to, or use by, any person or entity in any non-U.S. jurisdiction or country where such distribution or use would be contrary to any law or regulation, or which would subject Fund shares to any registration requirement within such jurisdiction or country.

Share Class Features

The table below summarizes the key features of the share class offered through this Prospectus. Please note that if you purchase shares through an intermediary that acts as a broker on your behalf, you may be required to pay a commission to your intermediary in an amount determined and separately disclosed to you by the intermediary. Consult your financial professional for further details.

	Class R6
Initial Sales Charge	None
Contingent Deferred Sales Charge ("CDSC")	None
Ongoing Distribution ("12b-1") Fees	None

Compensation to Financial Professionals and Intermediaries

No compensation is paid to intermediaries from Fund assets on sales of Class R6 shares or for related services. Class R6 shares do not carry sales commissions or pay Rule 12b-1 fees, or make payments to intermediaries to assist in, or in connection with, the sale of Fund shares. Neither the manager, the distributor nor their affiliates make any type of administrative or service payments to intermediaries in connection with investments in Class R6 shares.

Buying and Selling Fund Shares

Eligible retirement plans may make Class R6 shares available to plan participants by contacting certain intermediaries that have dealer agreements with the distributor. These entities may impose transaction charges. Plan participants may purchase shares through their retirement plan's administrator or record-keeper by following the process outlined in the terms of their plan.

Redemption requests received by a retirement plan's administrator or record-keeper from the plan's participants will be processed according to the terms of the plan's account with its intermediary. Plan participants should follow the process for selling fund shares outlined in the terms of their plan.

Requests in "Good Order". All purchase and redemption requests must be received in "good order." This means that a request generally must include:

- The Fund name(s), share class(es) and account number(s);
- The amount (in dollars or shares) and type (purchase or redemption) of the request;
- For purchase requests, payment of the full amount of the purchase request; and
- Any supporting legal documentation that may be required.

Purchase and redemption requests in good order will be processed at the next NAV calculated after the Fund's transfer agent or an authorized intermediary¹ receives your request. If your request is not received in good order, additional documentation may be required to process your transaction. We reserve the right to waive any of the above requirements.

1. The Fund's shares may be purchased through an intermediary that has entered into a dealer agreement with the Fund's distributor. The Fund has approved the acceptance of a purchase or redemption request effective as of the time of its receipt by such an authorized intermediary or its designee, as long as the request is received by one of those entities prior to the Fund's closing time. These intermediaries may charge transaction fees. We reserve the right to adjust the closing time in certain circumstances.

Timing of Redemption Proceeds. We normally will send out redemption proceeds within one business day after we accept your request to redeem. We reserve the right to delay payment for up to seven days. Payment of redemption proceeds may be delayed for longer than seven days under extraordinary circumstances or as permitted by the SEC in order to protect remaining shareholders. Such extraordinary circumstances are discussed further in the Statement of Additional Information.

Exchanging Fund Shares

Exchanges between two funds involve two transactions: (1) the redemption of shares of one fund; and (2) the purchase of shares of another. In general, the same rules and procedures described under "Buying and Selling Fund Shares" apply to exchanges. There are, however, additional policies and considerations you should keep in mind while making or considering an exchange:

- In general, exchanges may be made between like share classes of any fund in the Allspring Funds complex offered to the general public for investment (i.e., a fund not closed to new accounts), with the following exceptions: (1) Class A shares of non-money market funds may also be exchanged for Service Class shares of any retail or government money market fund; (2) Service Class shares may be exchanged for Class A shares of any non-money market fund; and (3) no exchanges are allowed into institutional money market funds.
- If you make an exchange between Class A shares of a money market fund or Class A2 or Class A shares of a non-money market fund, you will buy the shares at the public offering price of the new fund, unless you are otherwise eligible to buy shares at NAV.
- Same-fund exchanges between share classes are permitted subject to the following conditions: (1) the shareholder must meet the eligibility guidelines of the class being purchased in the exchange; (2) exchanges out of Class A and Class C shares would not be allowed if shares are subject to a CDSC; and (3) for non-money market funds, in order to exchange into Class A shares, the shareholder must be able to qualify to purchase Class A shares at NAV based on current Prospectus guidelines.
- An exchange request will be processed on the same business day, provided that both funds are open at the time the request is received. If one or both funds are closed, the exchange will be processed on the following business day.
- You should carefully read the Prospectus for the Fund into which you wish to exchange.
- Every exchange involves redeeming fund shares, which may produce a capital gain or loss for tax purposes.
- If you are making an initial investment into a fund through an exchange, you must exchange at least the minimum initial investment amount for the new fund, unless your balance has fallen below that amount due to investment performance.

- If you are making an additional investment into a fund that you already own through an exchange, you must exchange at least the minimum subsequent investment amount for the fund you are exchanging into.
- Class A and Class C share exchanges will not trigger a CDSC. The new shares received in the exchange will continue to age according to the original shares' CDSC schedule and will be charged the CDSC applicable to the original shares upon redemption.

Generally, we will notify you at least 60 days in advance of any changes in the above exchange policies.

Frequent Purchases and Redemptions of Fund Shares

Allspring Funds reserves the right to reject any purchase or exchange order for any reason. If a shareholder redeems \$20,000 or more (including redemptions that are part of an exchange transaction) from a Covered Fund (as defined below), that shareholder is "blocked" from purchasing shares of that Covered Fund (including purchases that are part of an exchange transaction) for 30 calendar days after the redemption.

Excessive trading by Fund shareholders can negatively impact a Fund and its long-term shareholders in several ways, including disrupting Fund investment strategies, increasing transaction costs, decreasing tax efficiency, and diluting the value of shares held by long-term shareholders. Excessive trading in Fund shares can negatively impact a Fund's long-term performance by requiring it to maintain more assets in cash or to liquidate portfolio holdings at a disadvantageous time. Certain Funds may be more susceptible than others to these negative effects. For example, Funds that have a greater percentage of their investments in non-U.S. securities may be more susceptible than other Funds to arbitrage opportunities resulting from pricing variations due to time zone differences across international financial markets. Similarly, Funds that have a greater percentage of their investments in small company securities may be more susceptible than other Funds to arbitrage opportunities due to the less liquid nature of small company securities. Both types of Funds also may incur higher transaction costs in liquidating portfolio holdings to meet excessive redemption levels. Fair value pricing may reduce these arbitrage opportunities, thereby reducing some of the negative effects of excessive trading.

Allspring Funds, other than the Adjustable Rate Government Fund, Conservative Income Fund, Ultra Short-Term Income Fund and Ultra Short-Term Municipal Income Fund ("Ultra-Short Funds") and the money market funds, (the "Covered Funds"). The Covered Funds are not designed to serve as vehicles for frequent trading. The Covered Funds actively discourage and take steps to prevent the portfolio disruption and negative effects on long-term shareholders that can result from excessive trading activity by Covered Fund shareholders. The Board has approved the Covered Funds' policies and procedures, which provide, among other things, that Allspring Funds Management may deem trading activity to be excessive if it determines that such trading activity would likely be disruptive to a Covered Fund by increasing expenses or lowering returns. In this regard, the Covered Funds take steps to avoid accommodating frequent purchases and redemptions of shares by Covered Fund shareholders. Allspring Funds Management monitors available shareholder trading information across all Covered Funds on a daily basis. If a shareholder redeems \$20,000 or more (including redemptions that are part of an exchange transaction) from a Covered Fund, that shareholder is "blocked" from purchasing shares of that Covered Fund (including purchases that are part of an exchange transaction) for 30 calendar days after the redemption. This policy does not apply to:

- Money market funds;
- Ultra-Short Funds;
- Dividend reinvestments;
- Systematic investments or exchanges where the financial intermediary maintaining the shareholder account identifies the transaction as a systematic redemption or purchase at the time of the transaction;
- Rebalancing transactions within certain asset allocation or "wrap" programs where the financial intermediary maintaining a shareholder account is able to identify the transaction as part of an asset allocation program approved by Allspring Funds Management;
- Rebalancing transactions by an institutional client of Allspring Funds Management or its affiliate following a model portfolio offered by Allspring Funds Management or its affiliate;
- Transactions initiated by a "fund of funds" or Section 529 Plan into an underlying fund investment;
- Permitted exchanges between share classes of the same Fund;
- Certain transactions involving participants in employer-sponsored retirement plans, including: participant withdrawals due to mandatory distributions, rollovers and hardships, withdrawals of shares acquired by participants through payroll deductions, and shares acquired or sold by a participant in connection with plan loans; and
- Purchases below \$20,000 (including purchases that are part of an exchange transaction).

The money market funds and the Ultra-Short Funds. Because the money market funds and Ultra-Short Funds are often used for short-term investments, they are designed to accommodate more frequent purchases and redemptions than the Covered Funds. As a result, the money market funds and Ultra-Short Funds do not anticipate that frequent purchases and redemptions, under normal circumstances, will have significant adverse consequences to the money market funds or Ultra-Short Funds or their shareholders. Although the money market funds and Ultra-Short Funds do not prohibit frequent trading, Allspring Funds Management will seek to prevent an investor from utilizing the money market funds and Ultra-Short Funds to facilitate frequent purchases and redemptions of shares in the Covered Funds in contravention of the policies and procedures adopted by the Covered Funds.

All Allspring Funds. In addition, Allspring Funds Management reserves the right to accept purchases, redemptions and exchanges made in excess of applicable trading restrictions in designated accounts held by Allspring Funds Management or its affiliate that are used at all times exclusively for addressing operational matters related to shareholder accounts, such as testing of account functions, and are maintained at low balances that do not exceed specified dollar amount limitations.

In the event that an asset allocation or “wrap” program is unable to implement the policy outlined above, Allspring Funds Management may grant a program-level exception to this policy. A financial intermediary relying on the exception is required to provide Allspring Funds Management with specific information regarding its program and ongoing information about its program upon request.

A financial intermediary through whom you may purchase shares of the Fund may independently attempt to identify excessive trading and take steps to deter such activity. As a result, a financial intermediary may on its own limit or permit trading activity of its customers who invest in Fund shares using standards different from the standards used by Allspring Funds Management and discussed in this Prospectus. Allspring Funds Management may permit a financial intermediary to enforce its own internal policies and procedures concerning frequent trading rather than the policies set forth above in instances where Allspring Funds Management reasonably believes that the intermediary’s policies and procedures effectively discourage disruptive trading activity. If you purchase Fund shares through a financial intermediary, you should contact the intermediary for more information about whether and how restrictions or limitations on trading activity will be applied to your account.

Account Policies

Advance Notice of Large Transactions. We strongly urge you to make all purchases and redemptions of Fund shares as early in the day as possible and to notify us or your intermediary at least one day in advance of transactions in Fund shares in excess of \$1 million. This will help us to manage the Funds most effectively. When you give this advance notice, please provide your name and account number.

Householding. To help keep Fund expenses low, a single copy of a Prospectus or shareholder report may be sent to shareholders of the same household. If your household currently receives a single copy of a Prospectus or shareholder report and you would prefer to receive multiple copies, please call Investor Services at 1-800-222-8222 or contact your intermediary.

Transaction Authorizations. We may accept telephone, electronic, and clearing agency transaction instructions from anyone who represents that he or she is a shareholder and provides reasonable confirmation of his or her identity. Neither we nor Allspring Funds will be liable for any losses incurred if we follow such instructions we reasonably believe to be genuine. For transactions through our website, we may assign personal identification numbers (PINs) and you will need to create a login ID and password for account access. To safeguard your account, please keep these credentials confidential. Contact us immediately if you believe there is a discrepancy on your confirmation statement or if you believe someone has obtained unauthorized access to your online access credentials.

Identity Verification. We are required by law to obtain from you certain personal information that will be used to verify your identity. If you do not provide the information, we will not be able to open your account. In the rare event that we are unable to verify your identity as required by law, we reserve the right to redeem your account at the current NAV of the Fund’s shares. You will be responsible for any losses, taxes, expenses, fees, or other results of such a redemption.

Right to Freeze Accounts, Suspend Account Services or Reject or Terminate an Investment. We reserve the right, to the extent permitted by law and/or regulations, to freeze any account or suspend account services when we have received reasonable notice (written or otherwise) of a dispute between registered or beneficial account owners or when we believe a fraudulent transaction may occur or has occurred. Additionally, we reserve the right to reject any purchase or exchange request and to terminate a shareholder’s investment, including closing the shareholder’s account.

Distributions

The Fund generally makes distributions of any net investment income and any realized net capital gains at least annually. Please contact your institution for distribution options. Please note, distributions have the effect of reducing the NAV per share by the amount distributed.

You are eligible to earn distributions beginning on the business day after the Fund's transfer agent or an authorized intermediary receives your purchase request in good order.

Other Information

Taxes

The following discussion regarding federal income taxes is based on laws that were in effect as of the date of this Prospectus and summarizes only some of the important federal income tax considerations affecting the Fund and you as a shareholder. It does not apply to foreign or tax-exempt shareholders or those holding Fund shares through a tax-advantaged account, such as a 401(k) Plan or IRA. This discussion is not intended as a substitute for careful tax planning. You should consult your tax adviser about your specific tax situation. Please see the Statement of Additional Information for additional federal income tax information.

The Fund elected to be treated, and intends to qualify each year, as a regulated investment company ("RIC") under the Internal Revenue Code of 1986, as amended. A RIC is not subject to tax at the corporate level on income and gains from investments that are distributed in a timely manner to shareholders. However, the Fund's failure to qualify as a RIC would result in corporate level taxation, and consequently, a reduction in income available for distribution to you as a shareholder.

We will pass on to a Fund's shareholders substantially all of the Fund's net investment income and realized net capital gains, if any. Distributions from a Fund's ordinary income and net short-term capital gains, if any, generally will be taxable to you as ordinary income. Distributions from a Fund's net long-term capital gains, if any, generally will be taxable to you as long-term capital gains. If you are an individual and meet certain holding period requirements with respect to your Fund shares, you may be eligible for reduced tax rates on qualified dividend income, if any, distributed by the Fund.

Corporate shareholders may be able to deduct a portion of their distributions when determining their taxable income.

Individual taxpayers are subject to a maximum tax rate of 37% on ordinary income and a maximum tax rate on long-term capital gains and qualified dividends of 20%. For U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly), a 3.8% Medicare contribution tax will apply on "net investment income," including interest, dividends, and capital gains. Corporations are subject to tax on all income and gains at a tax rate of 21%. However, a RIC is not subject to tax at the corporate level on income and gains from investments that are distributed in a timely manner to shareholders.

Distributions from a Fund normally will be taxable to you when paid, whether you take distributions in cash or automatically reinvest them in additional Fund shares. Following the end of each year, we will notify you of the federal income tax status of your distributions for the year.

If you buy shares of a Fund shortly before it makes a taxable distribution, your distribution will, in effect, be a taxable return of part of your investment. Similarly, if you buy shares of a Fund when it holds appreciated securities, you will receive a taxable return of part of your investment if and when the Fund sells the appreciated securities and distributes the gain. The Fund has built up, or has the potential to build up, high levels of unrealized appreciation.

Your redemptions (including redemptions in-kind) and exchanges of Fund shares ordinarily will result in a taxable capital gain or loss, depending on the amount you receive for your shares (or are deemed to receive in the case of exchanges) and the amount you paid (or are deemed to have paid) for them. Such capital gain or loss generally will be long-term capital gain or loss if you have held your redeemed or exchanged Fund shares for more than one year at the time of redemption or exchange. In certain circumstances, losses realized on the redemption or exchange of Fund shares may be disallowed.

When you receive a distribution from a Fund or redeem shares, you may be subject to backup withholding.

Financial Highlights

The following table is intended to help you understand a Fund's financial performance for the past five years (or since inception, if shorter). Certain information reflects financial results for a single Fund share. Total returns represent the rate you would have earned (or lost) on an investment in the Fund (assuming reinvestment of all distributions). The information in the following table has been derived from the Fund's financial statement which have been audited by KPMG LLP, the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statement, is also included in the Fund's annual report, a copy of which is available upon request.
