Allspring Funds

Dear Shareholder:

We are pleased to offer you this semi-annual report for the Allspring Asset Allocation Fund for the six-month period that ended November 30, 2023. Globally, stocks and bonds experienced high levels of volatility during the period. The market was focused on the impact of ongoing aggressive central bank rate hikes on persistently high inflation. As inflation finally gradually declined, anticipation rose over an end to the central bank monetary tightening cycle. For the six-month period, domestic U.S. and global stocks and bonds had positive overall results, with U.S. stocks leading the way. After suffering deep and broad losses through 2022, bonds now benefit from a base of higher yields that can help generate higher income.

For the period, U.S. stocks, based on the S&P 500 Index,¹ returned 10.17%. International stocks, as measured by the MSCI ACWI ex USA Index (Net),² gained 5.07% while the MSCI EM Index (Net) (USD)³ returned 4.60%. Among bond indexes, the Bloomberg U.S. Aggregate Bond Index⁴ returned -0.80%, the Bloomberg Global Aggregate ex-USD Index (unhedged)⁵ gained 0.63%, the Bloomberg Municipal Bond Index⁶ returned 2.29%, and the ICE BofA U.S. High Yield Index⁷ returned 5.53%.

Affected by high inflation and central bank rate hikes, markets were volatile.

The six-month period began in June with the Federal Reserve's (Fed's) first pause on interest rate hikes since March 2022, when it began its aggressive campaign to rein in inflation. However, the Core Consumer Price Index (CPI)⁸, while continuing to decline, remained stubbornly high in June at 4.8%—well above the Fed's 2.0% target rate. With the U.S. unemployment rate still at 3.6%, near a historical low, and U.S. payrolls continuing to grow in June, expectations of more Fed rate hikes were reinforced. However, U.S. and global stocks had strong returns in June.

July was a good month for stocks, while bonds had more muted but positive monthly returns overall. More volatile sectors and regions tended to do well, as investors grew more optimistic regarding economic prospects. With strong second quarter gross domestic product growth—initially estimated at 2.4%—and U.S. annual inflation easing steadily to 3.2% in July, hopes for a soft economic landing grew. The Fed, the European Central Bank (ECB), and the Bank of England (BoE) all raised their respective key interest rates by 0.25% in July. In the Fed's case, speculation grew that it could be very close to the end of its tightening cycle. Meanwhile, China's economy showed signs of stagnation, renewing concerns of global fallout.

¹ The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

² The Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) ex USA Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. Source: MSCI. ³ The MSCI Emerging Markets (EM) Index (Net) (USD) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of emerging markets. You cannot invest directly in an index.

⁴ The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S.-dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities. You cannot invest directly in an index.

⁵ The Bloomberg Global Aggregate ex-USD Index (unhedged) is an unmanaged index that provides a broad-based measure of the global investment-grade fixed income markets excluding the U.S.-dollar-denominated debt market. You cannot invest directly in an index.

⁶ The Bloomberg Municipal Bond Index is an unmanaged index composed of long-term tax-exempt bonds with a minimum credit rating of Baa. You cannot invest directly in an index.

⁷ The ICE BofA U.S. High Yield Index is a market-capitalization-weighted index of domestic and Yankee high yield bonds. The index tracks the performance of high yield securities traded in the U.S. bond market. You cannot invest directly in an index. Copyright 2024. ICE Data Indices, LLC. All rights reserved.

⁸ The Core Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services excluding energy and food prices. You cannot invest directly in an index.

Stocks retreated in August while monthly bond returns were flat overall. Increased global market volatility reflected unease over the Chinese property market being stressed along with weak Chinese economic data. However, speculation grew over a possible end to the Fed's campaign of interest rate increases or at least a pause in September. U.S. economic data generally remained solid, with resilient job market data and inflation ticking up slightly in August, as the annual CPI¹ rose 3.7%. However, the three-month trend for Core CPI stood at an annualized 2.4%.

Stocks and bonds both had negative overall returns in September as investors reluctantly recited the new chorus of "higher for longer," led by the Fed's determination not to lower interest rates until it knows it has vanquished its pesky opponent—higher-than-targeted inflation. As of September, the two primary gauges of U.S. inflation—the annual Core Personal Consumption Expenditures Price Index² and the CPI—both stood at roughly 4%, twice as high as the Fed's oft-stated 2% target. The month ended with the prospect of yet another U.S. government shutdown, averted at least temporarily.

October was a tough month for financial markets overall. Key global indexes were pushed down by rising geopolitical tensions—particularly the Israel-Hamas conflict, and concerns over the Fed's "higher for longer" monetary policy. The U.S. 10-year Treasury yield rose above 5% for the first time since 2007. Commodity prices did well as oil prices rallied in response to the prospect of oil supply disruptions from the Middle East. U.S. annualized third quarter GDP was estimated at a healthier-than-anticipated 4.9%. China's GDP indicated surprisingly strong industrial production and retail sales, offset by ongoing weakness in its real estate sector.

In November, the market mood turned positive as cooling inflation inspired confidence that central banks could hold off on further rate hikes. Overall annual inflation in the U.S. fell to 3.1% in November while 12-month inflation in the U.K. and eurozone eased to 4.6% and 2.4%, respectively—far below their peak levels of mid-2022. Third quarter annualized U.S. GDP growth was raised to an estimated 5.2% while U.S. job totals rose by just below 200,000 in November, indicating a slight cooling of the labor market. All of this fresh evidence added to confidence for a U.S. soft economic landing, leading to a more buoyant mood heading into winter as the Federal Open Market Committee held rates steady at its November meeting.

“ With strong second-quarter gross domestic product growth—initially estimated at 2.4%—and U.S. annual inflation easing steadily to 3.2% in July, hopes for a soft economic landing grew. ”

¹ The CPI is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. You cannot invest directly in an index.

² The Core Personal Consumption Expenditures Price Index (PCE) is a measure of prices that people living in the United States, or those buying on their behalf, pay for goods and services. It is sometimes called the core PCE price index, because two categories that can have price swings – food and energy – are left out to make underlying inflation easier to see. Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on an investment in a fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance shown without sales charges would be lower if sales charges were reflected. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Current month-end performance is available on the Fund's website, allspringglobal.com.

Index returns do not include transaction costs associated with buying and selling securities, any mutual fund fees or expenses, or any taxes. It is not possible to invest directly in an index.

For Class A shares, the maximum front-end sales charge is 5.75%. For Class C shares, the maximum contingent deferred sales charge is 1.00%. Performance including a contingent deferred sales charge assumes the sales charge for the corresponding time period. Administrator Class and Institutional Class shares are sold without a front-end sales charge or contingent deferred sales charge.

¹ Reflects the expense ratios as stated in the most recent prospectuses, which include the impact of 0.44% in acquired fund fees and expenses. The expense ratios shown are subject to change and may differ from the annualized expense ratios shown in the Financial Highlights of this report, which do not include acquired fund fees and expenses.

² The manager has contractually committed through September 30, 2025, to waive fees and/or reimburse expenses to the extent necessary to cap total annual fund operating expenses after fee waivers at 1.12% for Class A, 1.87% for Class C, 0.95% for Administrator Class and 0.80% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any) from funds in which the affiliated master portfolios and funds invest and from money market funds, and extraordinary expenses are excluded from the expense caps. All other acquired fund fees and expenses from the affiliated master portfolios and funds are included in the expense caps. Prior to or after the commitment expiration date, the caps may be increased or the commitment to maintain the caps may be terminated only with the approval of the Board of Trustees. Without these caps, the Fund's returns would have been lower. The expense ratio paid by an investor is the net expense ratio (the total annual fund operating expenses after fee waivers) as stated in the prospectuses.

Balanced funds may invest in stocks and bonds. Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the Fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. The use of derivatives may reduce returns and/or increase volatility. Foreign investments are especially volatile and can rise or fall dramatically due to differences in the political and economic conditions of the host country. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This fund is exposed to high-yield securities risk, mortgage-and asset-backed securities risk, geographic risk, and smaller-company securities risk. Consult the Fund's prospectus for additional information on these and other risks.

Fund expenses

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments and contingent deferred sales charges (if any) on redemptions and (2) ongoing costs, including management fees, distribution (12b-1) and/or shareholder servicing fees, and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period from June 1, 2023 to November 30, 2023.

Actual expenses

The “Actual” line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the “Actual” line under the heading entitled “Expenses paid during period” for your applicable class of shares to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The “Hypothetical” line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) and contingent deferred sales charges. Therefore, the “Hypothetical” line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

¹ Expenses paid is equal to the annualized net expense ratio of each class multiplied by the average account value over the period, multiplied by 183 divided by 366 (to reflect the one-half-year period).

² Amounts reflect net expenses allocated from the affiliated Master Portfolios in which the Fund invests.

Notes to financial statements

1. ORGANIZATION

Allspring Funds Trust (the “Trust”), a Delaware statutory trust organized on March 10, 1999, is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). As an investment company, the Trust follows the accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946, *Financial Services – Investment Companies*. These financial statements report on the Allspring Asset Allocation Fund (the “Fund”) which is a diversified series of the Trust.

The Fund is a fund-of-funds that invests in various affiliated mutual funds (“Underlying Funds”) employing a multi-asset, multi-style investment approach designed to reduce the price and return volatility of the Fund and to provide more consistent returns. The Fund may also invest directly in securities. The Underlying Funds incur separate expenses in seeking to achieve their investment objectives. Investments in affiliated Underlying Funds may also include investments in one or more separate diversified portfolios (collectively, the “affiliated Master Portfolios”) of Allspring Master Trust, a registered open-end management investment company. Each affiliated Master Portfolio directly acquires portfolio securities and the Fund acquires an indirect interest in those securities. The Fund accounts for its investments in the affiliated Master Portfolios as partnership investments and records on a daily basis its share of the affiliated Master Portfolio’s income, expense and realized and unrealized gains and losses. The financial statements of the affiliated Master Portfolios are presented in separate financial statements and may be obtained free of charge by contacting Investor Services or by visiting the SEC website at sec.gov. The financial statements of the affiliated Master Portfolios are filed with the SEC under Allspring Master Trust. The financial statements for all other affiliated Underlying Funds are also publicly available on the SEC website at sec.gov.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Investments in the affiliated Master Portfolios are valued daily based on the Fund’s proportionate share of each affiliated Master Portfolio’s net assets, which are also valued daily.

Equity securities, exchange-traded funds and futures contracts that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price.

Investments in registered open-end investment companies (other than those listed on a foreign or domestic exchange or market) are valued at net asset value.

Investments which are not valued using the methods discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, LLC (“Allspring Funds Management”), which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management’s process for determining the fair value of the portfolio of investments.

Futures contracts

Futures contracts are agreements between the Fund and a counterparty to buy or sell a specific amount of a commodity, financial instrument or currency at a specified price and on a specified date. The Fund may buy and sell futures contracts in order to gain exposure to, or protect against, changes in interest rates, security values and foreign exchange rates and is subject to interest rate risk, equity price risk and foreign currency risk. The primary risks associated with the use of futures contracts are the imperfect correlation between changes in market values of securities held by the Fund and the prices of futures contracts, and the possibility of an illiquid market. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange. With futures contracts, there is minimal counterparty risk to the Fund since futures contracts are exchange-traded and the exchange’s clearinghouse, as the counterparty to all exchange-traded futures, guarantees the futures contracts against default.

Upon entering into a futures contracts, the Fund is required to deposit either cash or securities (initial margin) with the broker in an amount equal to a certain percentage of the contract value. Subsequent payments (variation margin) are paid to or received from the broker each day equal to the daily changes in the contract value. Such payments are recorded as unrealized gains or losses and, if any, shown as variation margin receivable (payable) in

the Statement of Assets and Liabilities. Should the Fund fail to make requested variation margin payments, the broker can gain access to the initial margin to satisfy the Fund's payment obligations. When the contracts are closed, a realized gain or loss is recorded in the Statement of Operations.

Investment transactions, income and expenses

Investments in the affiliated Master Portfolios are recorded on a trade date basis. The Fund records daily its proportionate share of the affiliated Master Portfolio's income, expenses and realized and unrealized gains or losses. The Fund also accrues its own expenses.

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest earned on cash balances held at the custodian is recorded as interest income.

Income dividends and capital gain distributions from investment companies are recorded on the ex-dividend date. Capital gain distributions from investment companies are treated as realized gains.

Distributions to shareholders

Distributions to shareholders from net investment income and any net realized gains are recorded on the ex-dividend date and paid at least annually. Such distributions are determined in accordance with income tax regulations and may differ from U.S. generally accepted accounting principles. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of November 30, 2023, the aggregate cost of all investments for federal income tax purposes was \$1,201,353,757 and the unrealized gains (losses) consisted of:

Gross unrealized gains	\$134,137,948
Gross unrealized losses	(80,273,579)
Net unrealized gains	\$ 53,864,369

As of May 31, 2023, the Fund had capital loss carryforwards which consisted of \$29,344,768 in short-term capital losses.

Class allocations

The separate classes of shares offered by the Fund differ principally in applicable sales charges, distribution, shareholder servicing, and administration fees. Class specific expenses are charged directly to that share class. Investment income, common fund-level expenses, and realized and unrealized gains (losses) on investments are allocated daily to each class of shares based on the relative proportion of net assets of each class.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund’s assets and liabilities as of November 30, 2023:

	QUOTED PRICES (LEVEL 1)	OTHER SIGNIFICANT OBSERVABLE INPUTS (LEVEL 2)	SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	TOTAL
Assets				
Investments in:				
Investment companies	\$324,326,200	\$0	\$0	\$ 324,326,200
Investments measured at net asset value*				930,865,245
	324,326,200	0	0	1,255,191,445
Futures contracts	4,461,119	0	0	4,461,119
Total assets	\$328,787,319	\$0	\$0	\$1,259,652,564

Total liabilities	\$ 4,434,438	\$0	\$0	\$ 4,434,438

* Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been categorized in the fair value hierarchy. The fair value amount presented in the table is intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Statement of Assets and Liabilities. The Fund’s investments in the affiliated Master Portfolios are valued at \$930,865,245. Each affiliated Master Portfolio does not have a redemption period notice, can be redeemed daily and does not have any unfunded commitments.

Futures contracts are reported at their cumulative unrealized gains (losses) at measurement date as reported in the tables following the Portfolio of Investments. For futures contracts, the current day’s variation margin is reported on the Statement of Assets and Liabilities. All other assets and liabilities are reported at their market value at measurement date.

At November 30, 2023, the Fund did not have any transfers into/out of Level 3.

The investment objective of each affiliated Master Portfolio is as follows:

AFFILIATED MASTER PORTFOLIO	INVESTMENT OBJECTIVE
Allspring C&B Large Cap Value Portfolio	Seeks maximum long-term total return (current income and capital appreciation), consistent with minimizing risk to principal
Allspring Core Bond Portfolio	Seeks total return, consisting of income and capital appreciation

Allspring Real Return Portfolio	Seeks returns that exceed the rate of inflation over the long-term
Allspring Small Company Growth Portfolio	Seeks long-term capital appreciation
Allspring Small Company Value Portfolio	Seeks long-term capital appreciation

4. TRANSACTIONS WITH AFFILIATES

Management fee

Allspring Funds Management, a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., is the manager of the Fund and provides advisory and fund-level administrative services under an investment management agreement. Under the investment management agreement, Allspring Funds Management is responsible for, among other services, implementing the investment objectives and strategies of the Fund, supervising the subadviser and providing fund-level administrative

services in connection with the Fund's operations. As compensation for its services under the investment management agreement, Allspring Funds Management is entitled to receive a management fee at the following annual rate based on the Fund's average daily net assets:

AVERAGE DAILY NET ASSETS	MANAGEMENT FEE
First \$500 million	0.300%
Next \$500 million	0.280
Next \$2 billion	0.260
Next \$2 billion	0.240
Next \$5 billion	0.230
Over \$10 billion	0.220

For the six months ended November 30, 2023, the advisory fee was equivalent to an annual rate of 0.28% of the Fund's average daily net assets.

Allspring Funds Management has retained the services of a subadviser to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Allspring Funds Management. Allspring Global Investments, LLC, an affiliate of Allspring Funds Management and a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is the subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate starting at 0.10% and declining to 0.05% as the average daily net assets of the Fund increase.

Allspring Funds Management also serves as the adviser to each affiliated Master Portfolio and is entitled to receive a fee from each affiliated Master Portfolio for those services.

Administration fees

Under a class-level administration agreement, Allspring Funds Management provides class-level administrative services to the Fund, which includes paying fees and expenses for services provided by the transfer agent, sub-transfer agents, omnibus account servicers and record-keepers. As compensation for its services under the class-level administration agreement, Allspring Funds Management receives an annual fee which is calculated based on the average daily net assets of each class as follows:

	CLASS-LEVEL ADMINISTRATION FEE
Class A	0.20%
Class C	0.20
Class R	0.21
Administrator Class	0.13
Institutional Class	0.13

Prior to June 30, 2023, the class-level administration fee for Class A and Class C was 0.21% of its respective average daily net assets.

Waivers and/or expense reimbursements

Allspring Funds Management has contractually committed to waive and/or reimburse management and administration fees to the extent necessary to maintain certain net operating expense ratios for the Fund. When each class of the Fund has exceeded its expense cap, Allspring Funds Management will waive fees and/or reimburse expenses from fund-level expenses on a proportionate basis and then from class specific expenses. When only certain classes exceed their expense caps, waivers and/or reimbursements are applied against class specific expenses before fund-level expenses. Net expenses from the affiliated Master Portfolios are included in the expense caps. Allspring Funds Management has contractually committed through September 30, 2025 to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's expenses. Prior to or after the commitment expiration date, the caps may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees. As of November 30, 2023, the contractual expense caps are as follows:

	EXPENSE RATIO CAPS
Class A	1.12%
Class C	1.87
Administrator Class	0.95
Institutional Class	0.80

Prior to June 30, 2023, the Fund's expenses were capped at 1.13% for Class A shares and 1.88% for Class C shares.

Distribution fees

The Trust has adopted a distribution plan for Class C and Class R shares pursuant to Rule 12b-1 under the 1940 Act. Distribution fees are charged to Class C and Class R shares and paid to Allspring Funds Distributor, LLC ("Allspring Funds Distributor"), the principal underwriter, an affiliate of Allspring Funds Management, at an annual rate up to 0.75% of the average daily net assets of Class C shares and up to 0.25% of the average daily net assets of Class R shares.

In addition, Allspring Funds Distributor is entitled to receive the front-end sales charge from the purchase of Class A shares and a contingent deferred sales charge on the redemption of certain Class A shares. Allspring Funds Distributor is also entitled to receive the contingent deferred sales charges from redemptions of Class C shares. For the six months ended November 30, 2023, Allspring Funds Distributor received \$9,503 from the sale of Class A shares. No contingent deferred sales charges were incurred by Class A and Class C shares for the six months ended November 30, 2023.

Shareholder servicing fees

The Trust has entered into contracts with one or more shareholder servicing agents, whereby Class A, Class C, Class R, and Administrator Class are charged a fee at an annual rate up to 0.25% of the average daily net assets of each respective class. A portion of these total shareholder servicing fees were paid to affiliates of the Fund.

5. INVESTMENT PORTFOLIO TRANSACTIONS

The Fund seeks to achieve its investment objective by investing in various affiliated Master Portfolios. Purchases and sales related to these investments have been calculated by aggregating the results of multiplying the Fund's ownership percentage in the respective affiliated Master Portfolio at the end of the period by the corresponding affiliated Master Portfolio's purchases and sales. Purchase and sales in affiliated Underlying Funds and unaffiliated securities in which the Fund invests are actual purchases and sales of those investments. Purchases and sales of investments, excluding short-term securities, for the six months ended November 30, 2023 were as follows:

PURCHASES AT COST		SALES PROCEEDS	
U.S. GOVERNMENT	NON-U.S. GOVERNMENT	U.S. GOVERNMENT	NON-U.S. GOVERNMENT
\$108,235,754	\$522,307,086	\$106,670,343	\$658,697,658

6. DERIVATIVE TRANSACTIONS

During the six months ended November 30, 2023, the Fund entered into futures contracts for hedging purposes. The Fund had an average notional amount of \$391,426,776 in long futures contracts and \$371,844,453 in short futures contracts during the six months ended November 30, 2023.

A summary of the location of derivative instruments on the financial statements by primary risk exposure is outlined in the following tables.

The fair value of derivative instruments as of November 30, 2023 by primary risk type on the Statement of Assets and Liabilities was as follows for the Fund:

	INTEREST RATE RISK	EQUITY RISK	FOREIGN CURRENCY RISK	TOTAL
Asset derivatives				
Futures contracts	\$889,630*	\$3,519,031*	\$ 52,458*	\$4,461,119
Liability derivatives				
Futures contracts	\$ 60,805*	\$2,043,699*	\$2,329,934*	\$4,434,438

* Amount represents the cumulative unrealized gains (losses) as reported in the table following the Portfolio of Investments. For futures contracts, only the current day's variation margin as of November 30, 2023 is reported separately on the Statement of Assets and Liabilities.

The effect of derivative instruments on the Statement of Operations for the six months ended November 30, 2023 was as follows:

	INTEREST RATE RISK	EQUITY RISK	FOREIGN CURRENCY RISK	TOTAL
Net realized gains (losses) on derivatives				
Futures contracts	\$2,110,751	\$10,184,967	\$(3,423,828)	\$ 8,871,890
Net change in unrealized gains (losses) on derivatives				
Futures contracts	\$ 672,409	\$(6,917,418)	\$ (208,497)	\$(6,453,506)

7. BANK BORROWINGS

The Trust (excluding the money market funds), Allspring Master Trust and Allspring Variable Trust are parties to a \$350,000,000 revolving credit agreement whereby the Fund is permitted to use bank borrowings for temporary or emergency purposes, such as to fund shareholder redemption requests. Interest under the credit agreement is charged to the Fund based on borrowing rate equal to the higher of the Federal Funds rate or the overnight bank funding rate in effect on that day plus a spread. In addition, an annual commitment fee based on the unused balance is allocated to each participating fund.

For the six months ended November 30, 2023, there were no borrowings by the Fund under the agreement.

8. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund's organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.
