

## Allspring Conservative Income Fund

Class/Ticker: Institutional Class - WCIIIX

[Link to Prospectus](#)

[Link to SAI](#)

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at [allspringglobal.com/reports](http://allspringglobal.com/reports). You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to [fundliterature@allspring-global.com](mailto:fundliterature@allspring-global.com). The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated January 1, 2024, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

### Investment Objective

The Fund seeks current income consistent with capital preservation.

### Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

#### Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

#### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.25%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.16%
<b>Total Annual Fund Operating Expenses</b>	<b>0.41%</b>
Fee Waivers	(0.16)%
<b>Total Annual Fund Operating Expenses After Fee Waivers<sup>1</sup></b>	<b>0.25%</b>

1. The Manager has contractually committed through December 31, 2024, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.25% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

### Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$26
3 Years	\$115
5 Years	\$214
10 Years	\$502

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 105% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, we invest:

- substantially all of the Fund’s net assets in U.S. dollar-denominated short-term fixed-, floating- and variable-rate debt securities that meet our minimum quality standards.

Under normal circumstances, we invest substantially all of the Fund’s net assets in U.S. dollar-denominated short-term fixed-, floating- and variable-rate debt securities that have received either a minimum short-term rating of at least A-2 (or its equivalent) or a minimum long-term rating of BBB (or its equivalent), by one or more Nationally Recognized Statistical Ratings Organizations (“NRSROs”), or, if unrated, that are deemed by us to be of comparable quality at the time of purchase. However, under normal circumstances, we will not invest more than 30% of the Fund’s net assets in securities that have received either a short-term rating of A-2 (or its equivalent) or a long-term rating of BBB or BBB plus (or their equivalents), by one or more NRSROs, or, if unrated, that are deemed by us to be of comparable quality at the time of purchase.

We will concentrate the Fund’s investments in the banking industry, which means we will normally invest at least 25% of the Fund’s total assets in securities and other obligations of issuers in that industry. We may, however, invest less than 25% of the Fund’s assets in this industry as a temporary defensive measure.

Our portfolio holdings may include commercial paper, repurchase agreements, certificates of deposit, time deposits, bankers’ acceptances, U.S. Government obligations, municipal securities, corporate debt securities and mortgage- and asset-backed securities. The Fund also considers its investment in a cash sweep vehicle to constitute a “debt security” for purposes of the Fund’s investment strategy. We may invest in the U.S. dollar-denominated debt securities of both domestic and foreign issuers. We may also use Treasury futures for duration and yield curve management. The Fund will not invest in auction rate securities, structured investment vehicle (SIV) structures or mortgage- or asset-backed securities primarily backed by sub-prime or Alt-A residential collateral.

While we may invest in securities with a maximum maturity, average life or demand feature of three and one quarter years, under normal circumstances, we expect the Fund’s dollar-weighted average effective maturity to be one year or less. “Dollar-Weighted Average Effective Maturity” is a measure of the average time until the final payment of principal and interest is due on fixed income securities in the Fund’s portfolio.

We employ a combination of bottom-up, security-level analysis with a top down macroeconomic view to formulate security selection, sector and credit quality positioning, and duration decisions. Macroeconomic factors considered may include, among others, the pace of economic growth, employment conditions, corporate profits, inflation, monetary and fiscal policy, as well as the influence of international economic and financial conditions.

Our security selection process employs fundamental and quantitative techniques to identify attractive, risk-adjusted return opportunities among debt securities. Elements of this evaluation may include, among others, credit research, the measurement of volatility trends and historical yield spread relationships, and estimates of liquidity and investor demand. Our fundamental credit analysis may consider an issuer’s general financial condition, its competitive position and its management strategies, as well as industry characteristics and other factors.

Though the Fund’s net asset value will fluctuate, the Fund’s principal investment strategies are intended to manage volatility.

The Fund is not a money market fund.

## Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

**Market Risk.** The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

**Debt Securities Risk.** Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer's credit quality or financial strength declines. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Very low or negative interest rates may magnify interest rate risk.

**Industry Concentration Risk.** A Fund that concentrates its investments in an industry or group of industries is more vulnerable to adverse market, economic, regulatory, political or other developments affecting such industry or group of industries than a fund that invests its assets more broadly.

**Derivatives Risk.** The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than mitigate risk. Certain derivative instruments may be difficult to sell when the portfolio manager believes it would be appropriate to do so, or the other party to a derivative contract may be unwilling or unable to fulfill its contractual obligations.

**Foreign Investment Risk.** Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

**Futures Contracts Risk.** A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

**Management Risk.** Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

**Mortgage- and Asset-Backed Securities Risk.** Mortgage- and asset-backed securities may decline in value and become less liquid when defaults on the underlying mortgages or assets occur and may exhibit additional volatility in periods of rising interest rates. Rising interest rates tend to extend the duration of these securities, making them more sensitive to changes in interest rates than instruments with fixed payment schedules. When interest rates decline or are low, the prepayment of mortgages or assets underlying such securities can reduce a Fund's returns.

**Municipal Securities Risk.** Municipal securities may be fully or partially backed or enhanced by the taxing authority of a local government, by the current or anticipated revenues from a specific project or specific assets, or by the credit of, or liquidity enhancement provided by, a private issuer. Various types of municipal securities are often related in such a way that political, economic or business developments affecting one obligation could affect other municipal securities held by a Fund.

**U.S. Government Obligations Risk.** U.S. Government obligations may be adversely impacted by changes in interest rates, and securities issued or guaranteed by U.S. Government agencies or government-sponsored entities may not be backed by the full faith and credit of the U.S. Government. U.S. Government obligations may be adversely affected by a default by, or decline in the credit quality, of the U.S. Government.

## Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's website at [allspringglobal.com](http://allspringglobal.com).

### Calendar Year Total Returns for the Institutional Class as of 12/31 each year

### Average Annual Total Returns for the periods ended 12/31/2022

	Inception Date of Share Class	1 Year	5 Year	Since Inception
Institutional Class (before taxes)	5/31/2013	0.17%	1.33%	1.05%
Institutional Class (after taxes on distributions)	5/31/2013	-0.51%	0.66%	0.55%
Institutional Class (after taxes on distributions and the sale of Fund Shares)	5/31/2013	0.10%	0.74%	0.58%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)		-13.01%	0.02%	1.20%
Bloomberg 6-9 Month Treasury Bill Index (reflects no deduction for fees, expenses, or taxes)		0.15%	1.16%	0.76%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts.

## Purchase and Sale of Fund Shares

Institutional Class shares are generally available through intermediaries for the accounts of their customers and directly to institutional investors and individuals. Institutional investors may include corporations; private banks and trust companies; endowments and foundations; defined contribution, defined benefit and other employer sponsored retirement plans; institutional retirement plan platforms; insurance companies; registered investment advisor firms; bank trusts; 529 college savings plans; family offices; and funds of funds, including those managed by Allspring Funds Management. In general, you can buy or sell shares of the Fund online or by mail, phone or wire, on any day the New York Stock Exchange is open for regular trading. You also may buy and sell shares through a financial professional.

Minimum Investments	To Buy or Sell Shares
<b>Minimum Initial Investment</b> Institutional Class: \$1 million (this amount may be reduced or eliminated for certain eligible investors)	<b>Mail:</b> Allspring Funds P.O. Box 219967 Kansas City, MO 64121-9967 <b>Online:</b> allspringglobal.com <b>Phone or Wire:</b> 1-800-222-8222 <b>Contact your financial professional.</b>
<b>Minimum Additional Investment</b> Institutional Class: None	

## Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, subsequent withdrawals from such a tax-advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through an intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the intermediary and your financial professional to recommend the Fund over another investment. Consult your financial professional or visit your intermediary's website for more information.

**SUPPLEMENT TO THE PROSPECTUSES, SUMMARY PROSPECTUSES AND  
STATEMENT OF ADDITIONAL INFORMATION  
OF  
ALLSPRING TAXABLE FIXED INCOME  
For the Allspring Conservative Income Fund (the "Fund")**

At a meeting held on August 13-14, 2024, the Board of Trustees of Allspring Funds Trust unanimously approved the liquidation of the Fund.

Effective at the close of business on or about August 16, 2024, the Fund is closed to new investors and additional investments from existing shareholders.

The liquidation of the Fund is expected to occur after the close of business on or about October 25, 2024. Shareholders of the Fund on the date of liquidation will receive a distribution of their account proceeds in complete redemption of their shares. After the liquidation, the Fund will no longer be offered and all references to the Fund are removed from the prospectuses and Statement of Additional Information.
