Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at [allspringglobal.com/reports](http://allspringglobal.com/reports). You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to [fundliterature@allspring-global.com](mailto:fundliterature@allspring-global.com). The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated December 1, 2023, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

## Investment Objective

The Fund seeks long-term capital appreciation.

## Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

### Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.67%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.15%
<b>Total Annual Fund Operating Expenses</b>	<b>0.82%</b>
Fee Waivers	(0.12)%
<b>Total Annual Fund Operating Expenses After Fee Waivers<sup>1</sup></b>	<b>0.70%</b>

1. The Manager has contractually committed through November 30, 2024, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.70% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

## Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$72
3 Years	\$250
5 Years	\$443
10 Years	\$1,002

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 76% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund’s net assets in equity securities of large-capitalization companies; and
- up to 20% of the Fund’s total assets in equity securities of foreign issuers, including ADRs and similar investments.

We invest principally in equity securities of large-capitalization companies, which we define as securities of companies with market capitalizations within the range of the Russell 1000® Index at the time of purchase. The market capitalization range of the Russell 1000® Index was approximately \$452 million to \$2.66 trillion, as of October 31, 2023, and is expected to change frequently. We may also invest in equity securities of foreign issuers including ADRs and similar investments.

We focus on companies that dominate their market, are establishing new markets or are undergoing dynamic change. We believe earnings and revenue growth relative to expectations are critical factors in determining stock price movements. Thus, our investment process is centered around finding companies with under-appreciated prospects for robust and sustainable growth in earnings and revenue. To find that growth, we use bottom-up research, emphasizing companies whose management teams have a history of successfully executing their strategy and whose business models have sufficient profit potential. We forecast revenue and earnings revision opportunities, along with other key financial metrics to assess investment potential. We also believe that strong ESG policies and practices contribute to a company’s long-term sustainability of growth and therefore look for companies that are perceived as strong ESG performers or that have underappreciated ESG characteristics that we believe can drive future growth consistent with our forward-looking expectations. We combine our company-specific analysis with our assessment of secular and timeliness trends to form a buy/sell decision about a particular stock. We may invest in any sector, and at times we may emphasize one or more particular sectors. We sell a company’s securities when we see deterioration in fundamentals that leads us to become suspicious of a company’s prospective growth profile or the profitability potential of its business model, as this often leads to lower valuation potential. We may also sell or trim a position when we need to raise money to fund the purchase of a better investment opportunity or when valuation is extended beyond our expectations.

## Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

**Market Risk.** The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

**Equity Securities Risk.** The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer’s products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

**Foreign Investment Risk.** Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

**Growth/Value Investing Risk.** Securities that exhibit growth or value characteristics tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions.

**Management Risk.** Investment decisions, techniques, analyses or models implemented by a Fund’s manager or sub-adviser in seeking to achieve the Fund’s investment objective may not produce expected returns, may cause the Fund’s shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

## Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, subsequent withdrawals from such a tax-advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

## Payments to Intermediaries

If you purchase a Fund through an intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the intermediary and your financial professional to recommend the Fund over another investment. Consult your financial professional or visit your intermediary's website for more information.
