

## Allspring Short-Term High Income Fund

Class/Ticker: Administrator Class - WDHYX

[Link to Prospectus](#)

[Link to SAI](#)

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at [allspringglobal.com/reports](http://allspringglobal.com/reports). You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to [fundliterature@allspring-global.com](mailto:fundliterature@allspring-global.com). The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated January 1, 2024, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

### Investment Objective

The Fund seeks total return, consisting of a high level of current income and capital appreciation.

### Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

#### Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

#### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.47%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.37%
Acquired Fund Fees and Expense	0.01%
<b>Total Annual Fund Operating Expenses</b>	<b>0.85%</b>
Fee Waivers	(0.19)%
<b>Total Annual Fund Operating Expenses After Fee Waivers<sup>1</sup></b>	<b>0.66%</b>

1. The Manager has contractually committed through December 31, 2024, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.65% for Administrator Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

### Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$67
3 Years	\$252
5 Years	\$453
10 Years	\$1,031

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 27% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund’s net assets in below investment-grade corporate debt securities; and
- up to 25% of the Fund’s total assets in U.S. dollar-denominated debt securities of foreign issuers.

We invest principally in below investment-grade debt securities (often called “high-yield” securities or “junk bonds”) of corporate issuers. These include traditional corporate bonds as well as bank loans. These securities may have fixed, floating or variable rates. As part of our below investment-grade debt securities investment strategy, we will generally invest in securities that are rated BB through CCC by Standard & Poor’s or Ba through Caa by Moody’s, or an equivalent quality rating from another Nationally Recognized Statistical Ratings Organization, or are deemed by us to be of comparable quality. We may also use credit default swap agreements to reduce cash positions and to cost-effectively increase credit exposure, and futures to manage duration exposure. While we may purchase securities of any maturity, under normal circumstances, we expect the Fund’s dollar-weighted average effective maturity to be three years or less. “Dollar-Weighted Average Effective Maturity” is a measure of the average time until the final payment of principal and interest is due on fixed income securities in the Fund’s portfolio.

We start our investment process with a focus on bottom-up fundamental credit analysis to generate new ideas, to understand the potential risks, to select individual securities that may potentially add value from income and/or capital appreciation. Our credit research may include an assessment of an issuer’s general financial condition, its competitive positioning and management strength, as well as industry characteristics and other factors including an assessment of environmental, social and governance (ESG) factors that are deemed to have material business and/or financial risk. The ESG factors utilized in the fund’s investment process may change over time, some factors may not be relevant with respect to all issuers and may or may not be determinative in the security selection process. We may sell a security due to changes in credit characteristics or outlook, as well as changes in portfolio strategy or cash flow needs. A security may also be sold and replaced with one that presents a better value or risk/reward profile.

## Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

**Market Risk.** The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

**Debt Securities Risk.** Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer's credit quality or financial strength declines. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Very low or negative interest rates may magnify interest rate risk.

**High Yield Securities Risk.** High yield securities and unrated securities of similar credit quality (commonly known as "junk bonds") are considered speculative and have a much greater risk of default or of not returning principal and their values tend to be more volatile than higher-rated securities with similar maturities.

**Derivatives Risk.** The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than mitigate risk. Certain derivative instruments may be difficult to sell when the portfolio manager believes it would be appropriate to do so, or the other party to a derivative contract may be unwilling or unable to fulfill its contractual obligations.

**Foreign Investment Risk.** Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

**Futures Contracts Risk.** A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

**Loan Risk.** Loans may be unrated, less liquid and more difficult to value than traditional debt securities. The highly leveraged capital structure of the borrowers in such transactions may make such loans especially vulnerable to adverse changes in financial, economic or market conditions. A Fund may be unable to sell loans at a desired time or price. The Fund may also not be able to control amendments, waivers or the exercise of any remedies that a lender would have under a direct loan and may assume liability as a lender.

**Management Risk.** Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

**Swaps Risk.** Depending on their structure, swap agreements and options to enter into swap agreements ("swaptions"), both of which are types of derivatives, may increase or decrease a Fund's exposure to long- or short-term interest rates, foreign currency values, mortgage-backed securities, corporate borrowing rates, or credit events or other reference points such as security prices or inflation rates.

## Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's website at [allspringglobal.com](http://allspringglobal.com).

### Calendar Year Total Returns for Administrator Class as of 12/31 each year

### Average Annual Total Returns for the periods ended 12/31/2022

	Inception Date of Share Class	1 Year	5 Year	10 Year
Administrator Class (before taxes)	7/30/2010	-1.84%	2.94%	2.83%
Administrator Class (after taxes on distributions)	7/30/2010	-3.54%	1.40%	1.34%
Administrator Class (after taxes on distributions and the sale of Fund Shares)	7/30/2010	-1.10%	1.60%	1.50%
Bloomberg U.S. Universal Bond Index (reflects no deduction for fees, expenses, or taxes)		-12.99%	0.18%	1.33%
ICE BofA 1-3 Year BB U.S. Cash Pay High Yield Index (reflects no deduction for fees, expenses, or taxes)		-2.89%	3.09%	3.61%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts.

## Fund Management

Manager	Sub-Adviser	Portfolio Manager, Title/Managed Since
Allspring Funds Management, LLC	Allspring Global Investments, LLC	<b>Chris Lee, CFA</b> , Portfolio Manager / 2020 <b>Michael J. Schueller, CFA</b> , Portfolio Manager / 2007

### Purchase and Sale of Fund Shares

Administrator Class shares are generally available through intermediaries for the accounts of their customers and directly to institutional investors and individuals. Institutional investors may include corporations; private banks and trust companies; endowments and foundations; defined contribution, defined benefit and other employer sponsored retirement plans; institutional retirement plan platforms; insurance companies; registered investment advisor firms; bank trusts; 529 college savings plans; family offices; and funds of funds, including those managed by Allspring Funds Management. In general, you can buy or sell shares of the Fund online or by mail, phone or wire, on any day the New York Stock Exchange is open for regular trading. You also may buy and sell shares through a financial professional.

Minimum Investments	To Buy or Sell Shares
<b>Minimum Initial Investment</b> Administrator Class: \$1 million (this amount may be reduced or eliminated for certain eligible investors)	<b>Mail:</b> Allspring Funds P.O. Box 219967 Kansas City, MO 64121-9967 <b>Online:</b> allspringglobal.com <b>Phone or Wire:</b> 1-800-222-8222 <b>Contact your financial professional.</b>
<b>Minimum Additional Investment</b> Administrator Class: None	

### Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, subsequent withdrawals from such a tax-advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

### Payments to Intermediaries

If you purchase a Fund through an intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the intermediary and your financial professional to recommend the Fund over another investment. Consult your financial professional or visit your intermediary's website for more information.
