Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at allspringglobal.com/reports. You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to fundliterature@allspring-global.com. The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated September 1, 2024, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

Investment Objective

The Fund seeks long-term capital appreciation with no emphasis on income.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)¹

Management Fees	0.25%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.43%
Acquired Fund Fees and Expenses	0.26%
Total Annual Fund Operating Expenses²	0.94%
Fee Waivers	(0.01)%
Total Annual Fund Operating Expenses After Fee Waivers^{2,3}	0.93%

- Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.
- The expense ratio shown does not correlate to the corresponding expense ratio shown in the Financial Highlights, which reflects only the operating expenses of the Fund and does not include any acquired fund fees and expenses.
- The Manager has contractually committed through August 31, 2025, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waivers at 0.67% for Administrator Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), net expenses from affiliated master portfolios, and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$95
3 Years	\$299
5 Years	\$519
10 Years	\$1,154

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 62%¹ of the average value of its portfolio.

1. The Fund changed its fiscal year-end from May 31 to April 30. The information shown for the Fund is for this shortened period.

Principal Investment Strategies

The Fund is a fund-of-funds that invests in various affiliated and unaffiliated mutual funds and exchange-traded funds (“Underlying Funds”) to pursue its investment objective. We seek to achieve the Fund’s investment objective by investing at least 80% of the Fund’s net assets in equity securities (through investment in Underlying Funds). The Fund is a diversified equity investment that consists of Underlying Funds that employ different and complementary investment styles to provide potential for growth. These equity styles include large company, small company, and international. The Fund will invest at least 50% and up to 70% of its assets in U.S. large company stock funds, at least 20% and up to 40% of its assets in international stock funds and up to 20% of its assets in U.S. small company stock funds. Additionally, we may invest up to 20% of the Fund’s net assets in bond or alternative-style asset classes (through investment in Underlying Funds).

The Fund’s “neutral” target allocation is as follows:

- 60% of the Fund’s total assets in U.S. large company stock funds;
- 30% of the Fund’s total assets in international stock funds; and
- 10% of the Fund’s total assets in U.S. small company stock funds.

We may adjust the Fund’s target allocation throughout the year.

Depending on market conditions, some equity asset classes will perform better than others. The Fund’s broad diversification across equity styles and the use of tactical allocation between equity styles may help to reduce the overall impact of poor performance in any one equity asset class.

We employ both quantitative analysis and qualitative judgments in making tactical allocations among various Underlying Funds. Quantitative analysis involves the use of proprietary asset allocation models, which employ various valuation techniques. Qualitative judgments are made based on assessments of a number of factors, including economic conditions, corporate earnings, monetary policy, market valuations, investor sentiment, and market technicals. Changes to effective allocations in the Fund may be implemented with index futures contracts or by buying and selling Underlying Funds, or both.

The Fund incorporates a derivatives overlay strategy that contains three specific risk management components: 1.) Tactical Asset Allocation (TAA) Overlay, 2.) Volatility Management Overlay (VMO), and 3.) Tail Risk Management (TRM). Together these strategies will allow the Fund to attempt to manage short-term volatility, mitigate risk and/or improve returns under certain market conditions. To execute this overlay strategy, the Fund invests in long and/or short positions in exchange-traded futures contracts across a variety of asset classes, which include, but are not limited to, stocks, bonds, and currencies.

Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security,

such as management performance, financial condition, and market demand for the issuer's products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

Underlying Funds Risk. The risks associated with a Fund include the risks related to each Underlying Fund in which the Fund invests.

Alternative Investment Risk. Alternative investment strategies, which may include, but are not limited to, investing in non-traditional investments such as commodities, or following risk premia, managed futures, merger arbitrage, global multi-asset, long-short, market neutral, systematic or other tactical investment strategies, may involve complex securities types or transactions and extensive short positions and/or focus on narrow segments of the market, which may increase and/or magnify the overall risks and volatility associated with the strategies.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than mitigate risk. Certain derivative instruments may be difficult to sell when the portfolio manager believes it would be appropriate to do so, or the other party to a derivative contract may be unwilling or unable to fulfill its contractual obligations.

Emerging Markets Risk. Emerging market securities typically present even greater exposure to the risks described under "Foreign Investment Risk" and may be particularly sensitive to global economic conditions. Emerging market securities are also typically less liquid than securities of developed countries and could be difficult to sell, particularly during a market downturn.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Growth/Value Investing Risk. Securities that exhibit growth or value characteristics tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than those of larger companies.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. The Fund's Regulatory Benchmark is a broad-based index that represents the overall securities markets relative to the Fund's asset category while the Fund's Strategy Benchmark is most closely aligned with the Fund's investment universe based on its investment strategy. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's website at www.allspringglobal.com.

Calendar Year Total Returns for Administrator Class as of 12/31 each year¹

Average Annual Total Returns for the periods ended 12/31/2023¹

	Inception Date of Share Class	1 Year	5 Year	10 Year
Administrator Class (before taxes)	2/4/2022	19.35%	12.19%	8.02%

Minimum Additional Investment Administrator Class: None	

Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, subsequent withdrawals from such a tax-advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

Payments to Intermediaries

If you purchase a Fund through an intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the intermediary and your financial professional to recommend the Fund over another investment. Consult your financial professional or visit your intermediary's website for more information.
