This report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the past year?

The table explains the consolidated costs you would have paid within the reporting period based on a hypothetical \$10,000 investment.

CLASS NAME	CONSOLIDATED COST OF A \$10,000 INVESTMENT	COSTS PAID AS A % OF A \$10,000 INVESTMENT
Class R6	\$63	0.62%

The manager has contractually committed to waive fees and/or reimburse certain expenses to the extent necessary to cap the Fund's total annual fund operating expense ratio at a specific amount. Without this cap, the costs shown above may have been higher. Please see the prospectus for the amount and the expiration date of the cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

How did the Fund perform last year and what affected its performance?

Portfolio changes during the period included enhancements to macro, value, and momentum risk premia strategies as well as the multi-factor equity strategy of the fund. Over the past 12 months, momentum, value, and multi-factor equities were the main drivers of the Fund's positive performance from a style perspective. Commodities were the most profitable asset class, while trend strategies detracted from relative performance amid the large reversals across rates and currencies.
