What were the Fund costs for the past year?

The table explains the costs you would have paid within the reporting period based on a hypothetical \$10,000 investment.

CLASS NAME	COST OF A \$10,000 INVESTMENT	COSTS PAID AS A % OF A \$10,000 INVESTMENT
Class C	\$152	1.50%

The manager has contractually committed to waive fees and/or reimburse certain expenses to the extent necessary to cap the Fund's total annual fund operating expense ratio at a specific amount. Without this cap, the costs shown above may have been higher. Please see the prospectus for the amount and the expiration date of the cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

How did the Fund perform last year and what affected its performance?

Fixed income markets remained volatile throughout the period as investors questioned the path of interest rate movements and the U.S. Federal Reserve continued to battle persistent inflationary pressures. The main drivers of performance were positive security selection, duration/yield curve positioning, and credit quality allocation versus the performance benchmark, Bloomberg California Municipal Bond Index. Sector allocation detracted for the period. We believe a continued focus on active exposures should benefit the portfolio, as we expect to enter a 12-month period of falling interest rates.
